SSIS Interview Questions and Answers for Experienced and Freshers

Here we are publishing series of posts on SSIS Interview questions and answers Part 4 for experienced and freshers. Below is the series 4.

Q. Difference between Union-all and Merge Join?

Ans :

- Merge transformation can accept only two inputs whereas Union all can take more than two inputs

- Data has to be sorted before Merge Transformation whereas Union all doesn't have any condition like that.

Q. What is difference between Multicast and Conditional Split?

Ans :

The Multicast transformation distributes its input to one or more outputs. This transformation is similar to the Conditional Split transformation. Both transformations direct an input to multiple outputs. The difference between the two is that the Multicast transformation directs every row to every output, and the Conditional Split directs a row to a single output

Q. What is the difference between DTS and SSIS?

Ans :

Well, nothing except both the Microsoft SQL Server Products.

Even though both are the ETL tools, we can differentiate if you are asked observations.

farmer producer organizations FPOs have emerged as a means of collectivizing smallholder farmers and providing them access to extension innovation and market services FPOs that center women farmers traditionally at a disadvantage vis vis their male counterparts in access to resources and extension can serve to enhance women s agency and collective action in agricultural value chains We used 59 key informant interviews and nine focus group discussions to examine the constraints to and facilitators of women s and men s participation in three women only FPOs in Jharkhand an eastern Indian state Additionally we study the gender and power dynamics in such FPOs and the potential of collective efficacy to enhance agricultural and empowerment outcomes The FPO intervention we evaluated was supported by an NGO that provides FPO members with both agricultural and gender based inputs to improve agronomic practices market linkages agricultural yields and profits and the role of women both within the FPO and within their households and communities In this paper we provide contextual insights on what works to empower women in this context Women s perceptions of the benefits from FPO membership were heterogeneous Our qualitative analysis suggests a nuanced picture of women s autonomy and decision making within and outside their household further shaped by women s and men s perception of shifts in women s access to resources and services The emerging lessons provide inputs for development implementers and policymakers to recognize diverse contextual barriers in designing FPO interventions to enable and enhance women empowerment outcomes The research also contributes to the body of knowledge on local gender norms and understanding of empowerment
