en route to becoming the global commonwealth it is today Golden Dreams continues an epic series that has been widely recognized for its signal contribution to the history of American culture in California It is a book that transcends its stated subject to offer a wealth of insight into the growth of the Sun Belt and the West and indeed the dramatic transformation of America itself in these pivotal years following the Second World War *Water Histories and Spatial Archaeology* Michael J. Harrower, 2016-05-03 Compares ancient Southwest Arabia with the American West to illustrate revealing similarities and contrasts surrounding water usage **Managing Water** Ms. Dorothy Green, 2007-10-09 Water in California is controlled stored delivered and managed within a complex network of interlocking and cooperating districts and agencies Unraveling and understanding this system is not easy This book describes how the current system works or doesn't work and discusses the issues that face elected officials water and resource managers and the general public Using the Los Angeles area as a microcosm of the state environmental activist Dorothy Green gathers detailed information on its water systems and applies the lessons learned from this data statewide A useful primer on watershed and water policy issues this book provides reasoned thoughtful and insightful arguments about sustainability **New Water Regimes** Jacque Emel, Alida Cantor, 2018-05-22 This book is a printed edition of the Special Issue New Water Regimes that was published in Resources

Water Politics Thomas T. Holyoke, 2023-11-13 This book is about the enactment adaption and ultimately fragmentation of government policy regarding the use of water in the American west It describes its origins how it became about building big projects and how it was fragmented by pressures from environmental activism The book also explores the western water crisis in the United States The case studies used in here will help readers understand water development and the political battles around it in most of the western states to show here how and why the policy changed and even broke down The book is divided into two parts and describes the different eras of water policy While most books on water policy focus on its deficiencies for meeting future challenges Water Politics The Fragmentation of Western Water Policy attempts to explore why those deficiencies occurred in the first place The book is intended for undergraduate and graduate students in political science and policy studies who are interested in how public policies are enacted how they change and how they fall apart over time and why The book will also be of particular interest to students in other disciplines that deal with water such as environmental studies geology sociology hydrology and civil engineering *Owens Valley Revisited* Gary D. Libecap, 2007 In the contemporary West pressures to more effectively reallocate water to meet growing urban and environmental demands are increasing as environmental awareness grows and climate change threatens existing water supplies The legacy of Owens Valley raises concerns about how reallocation can occur Although it took place over seventy years ago the water transfer from Owens Valley to Los Angeles still plays an important role in perceptions of how water markets work The memory of Owens Valley transfer is one of theft and environmental destruction at the hands of Los Angeles In reassessing the infamous transfer one could say that there was no theft Owens Valley landowners fared well in their land and water sales earning more

than if they had stayed in agriculture In another sense however theft did occur The water was not literally stolen but there was a sharp imbalance in gains from the trade with most of the benefits going to Los Angeles Owens Valley then demonstrates the importance of distributional issues in water trades when the stakes are large Los Angeles water rights in the Owens Valley and Mono Basin have again been a front page issue since 1970 New environmental and recreational values and air pollution concerns have ushered in demands to curtail the shipment of water from source regions for urban use Owens Valley Revisited A Reassessment of the West's First Great Water Transfer carefully explores how these sagas were addressed considering the costs involved and alternative approaches that might have resulted in more rapid and less contentious remedies This analysis offers insights to guide the ongoing conversation about water politics and the future thereof

Water Politics in the Murray-Darling Basin Daniel Connell, 2007 In January 2007 the Australian Prime Minister John Howard announced a 10 billion plan to reform rural water management Most of the effort will focus on the Murray Darling Basin In this book Daniel Connell explains why there is a crisis in the Murray Darling He highlights the disastrous consequences of a century of fitful reluctant co operation between the six governments responsible for the region Connell argues that a new institutional system is essential but a Commonwealth takeover is not the best answer Instead the Commonwealth government should use its constitutional and financial power to force the States to adopt national policies and stick to them whatever the local politics The States would continue to play a substantial role but the controls would be tighter the framework more comprehensive He also shows how

the National Water Initiative the great blueprint for water reform has stalled with many of its most important recommendations ignored So far the public debate about the future of the Murray Darling Basin has concentrated on new technical projects and increased water trading Connell argues that unless institutional change is given priority hundreds of millions of dollars of annual investment will be frittered away and the crisis will continue [Bureau of Reclamation](#) Interior Department,2013-06-13 NOTE NO FURTHER DISCOUNT FOR THIS PRODUCT OVERSTOCK SALE Significantly reduced list price The second volume of the history of the Bureau of Reclamation offers a discussion and examination of the eventful years in the latter part of the twentieth century Volume two covers from the end of World War II through year 2000 and is the last volume in this project [The Bureau of Reclamation: Origins and growth to 1945](#) William D.
