O. Griffiths,2019-08-09 A study

of Botswana s dual face of prosperity and poverty and that relates to its land use policies Transformations on the Ground considers the ways in which power in all its forms local international legal familial affects the collision of global with local concerns over access to land and control over its use In Botswana s struggle to access international economies few resources are as fundamental and fraught as control over land On a local level land and control over its use provides homes livelihoods and the economic security to help lift populations out of impoverishment Yet on the international level global capital concerns compete with strategies for sustainable development and economic empowerment Drawing on extensive archival research legal records fieldwork and interviews with five generations of family members in the village of Molepolole Anne M O

Griffiths provides a sweeping consideration of the scale of power from global economy to household experience in Botswana. In doing so, Griffiths provides a frame through which the connections between legal power and local engagement can provide fresh insight into our understanding of the global. Botswana is a darling of international donors and regularly praised as an upwardly mobile, prosperous and successful country. At the same time, it is characterized by poverty and exclusion, especially of women. In her insightful case study on land politics, Anne Griffiths effectively contrasts the image of a coherent state against myriad realities and confusion of competences on the ground. Based on decades of ethnographic fieldwork, this book masterfully demonstrates how, in the realm of land and law, international, national, regional and local domains intersect and overlap and come into conflict with one another. Andreas Eckert, Humboldt University Berlin.

Anne Griffiths' ambitious and original book reveals how the global is always situated in specific places and times through her insightful analysis of how land in Botswana has figured in practices, policy and politics from the standpoints of household, family, village, district, national and international levels. Griffiths' astute use of political and legal history, legal documents, observation of statutory and customary law settings, multi-generational life histories and detailed ethnography enable her to provide a rich and informative account that goes well beyond the mantra of the global in the local. While insisting on foregrounding the voices, perceptions and experiences of people's relationships with land, Griffiths shows how these interact with national politics, policies, laws and legal practice and with the effects of international and global agencies and processes to produce inequality and class differences, despite some improvement in gendered patterns of land entitlement.

Teaching Reading Comprehension to English Learners in Secondary Schools: A Research-Based Approach Cekiso, Madoda, Olifant, Florence, Mokhtari, Kouider, 2025-04-23

Teaching reading comprehension to English learners (ELs) in secondary schools presents unique challenges as these students must navigate the complexities of academic texts and the intricacies of language acquisition. Effective instruction requires a research-based approach that considers the diverse linguistic, cultural and cognitive backgrounds of these learners. Recent studies highlight the importance of integrating strategies that build both language proficiency and content knowledge, essential for helping ELs develop the skills needed to comprehend complex materials. Fostering metacognitive awareness through strategies like summarizing, questioning and making connections can empower students to become active and strategic readers. This approach recognizes the need for a supportive, inclusive classroom environment that encourages language development while promoting academic achievement in content areas. Further research may help educators provide English learners with the tools to thrive as capable readers in secondary school.

Teaching Reading Comprehension to English Learners in Secondary School: A Research-Based Approach explores various aspects of teaching reading comprehension to English Second Language (ESL) learners in secondary schools. It examines current challenges and evidence-based strategies in reading comprehension. This book covers topics such as language learning, reading strategies and teacher training and is a
