Sfma X Matrix Manual

James H. Hogge

Sfma X Matrix Manual:

User's Manual for MODSOV, a Terminal Operated Program Solving the Linear Matrix Equation X , 1974 To meet day to day calculation requirements of ecological systems the linear matrix equation $x Ax k$ was programmed for terminal operation The existing program MATEXP which deals with this problem class was adapted to the task A simple conversational structure was created to enable use of the program with only a few minutes of training The user can designate a specific activity or a radioactivity model thereby causing the program to undertake some of the coefficient processing from minimal input Or he may choose to solve a more general problem and supply all coefficients explicitly A unique feature of 3 the program is an option which permits the user to suppress short time characteristics after they have no more appreciable effect on the solutions This option enables avoidance of the most often encountered form of mathematical instability for this class of problems auth *Matrix Manipulation System* James H.
