Research based reports on fire safety engineering and design of buildings and other structures Egress Design Solutions Jeffrey Tubbs, Brian Meacham, 2007-05-01 The architect s primary source for information on designing for egress evacuation and life safety Egress Design Solutions Emergency Evacuation and Crowd Management Planning is written by proven experts on egress issues Meacham and Tubbs are engineers with Arup an international firm with a stellar reputation for quality design and engineering Their book examines egress solutions in terms of both prescriptive and performance based code issues A portion of the book focuses on techniques for providing egress design solutions and for coordinating egress systems with other critical life safety systems Another part reviews historic and recent tragic life loss fire events As such this is easily the most comprehensive take on the subject written especially for architects Structural Fire Engineering Venkatesh Kodur, Mohannad Naser, 2020-02-28 Actionable strategies for the design and construction of fire resistant structures This hands on guide clearly explains the complex building codes and standards that relate to fire design and presents hands on techniques engineers can apply to prevent or mitigate the effects of fire in structures Dedicated chapters discuss specific procedures for steel concrete and timber buildings You will get step by step guidance on how to evaluate fire resistance

using both testing and calculation methods Structural Fire Engineering begins with an introduction to the behavioral aspects of fire and explains how structural materials react when exposed to elevated temperatures From there the book discusses the fire design aspects of key codes and standards such as the International Building Code the International Fire Code and the NFPA Fire Code Advanced topics are covered in complete detail including residual capacity evaluation of fire damaged structures and fire design for bridges and tunnels Explains the fire design requirements of the IBC IFC the NFPA Fire Code and National Building Code of Canada Presents design strategies for steel concrete and timber structures as well as for bridges and tunnels Contains downloadable spreadsheets and problems along with solutions for instructors

The New Walford Guide to Reference Resources Ray Lester, 2005 The New Walford highlights the best resources to use when undertaking a search for accurate and relevant information saving you precious time and effort For those looking for a selective and evaluative reference resource that really delivers on its promise look no further In addition to print sources The New Walford naturally covers an extensive range of e reference sources such as digital databanks digital reference services electronic journal collections meta search engines networked information services open archives resource discovery services and websites of premier organizations in both the public and private sectors But rather than supplying a list of all available known resources as a web search engine might The New Walford subject specialists have carefully selected and evaluated available resources to provide a definitive list of the most appropriate and useful With an emphasis on quality and sustainability the subject specialists have been careful to assess the differing ways that information is framed and communicated in different subject areas As a result the resource evaluations in each subject area are prefaced by an introductory overview of the structure of the relevant literature This ensures that The New Walford is clear easy to use and intuitive Publisher
