Language of Symbols Matthew Wilson,2022-11-03 Why do we reach for the red rose on Valentines day Where did the owl gain its reputation for wisdom Why should you never trust a fox In this visual tour through art history Matthew Wilson pieces together a global visual language enshrined in art the language of symbols Symbols exert a strong hold in the image saturated 21st century and have done so for thousands of years From national emblems to corporate logos and emojis our day to day lives abound with icons with roots in the distant past Expert art historian Matthew Wilson traces the often surprising trajectories that symbols have taken through history from their original purposes to their modern meanings identifying the common themes and ideas that link seemingly disparate cultures Thus we meet the falcon as a symbol of authority from the ancient Egyptian pharaohs to the medieval aristocracy the dog as stalwart companion from the classical era to the Renaissance and the mythical phoenix as a symbol of female power connecting a queen in England with a goddess in China We also see moments of radical reinterpretation and change the transformation of the swastika from an auspicious symbol of hope to one of hate From Palaeolithic cave paintings to contemporary installations Wilson deftly guides us through this world of symbols showcasing their enduring ability to express power hope fear and faith and to create and communicate identities uniting or dividing the people that made them [The Ugly History of Beautiful Things](#) Katy Kelleher,2024-04-23

Botanical Architecture Paul Dobraszczyk, 2024-11-12 An original call to reorient architecture around our relationship to plants When we look at trees we see a form of natural architecture and yet we have seemingly always exploited trees to make new buildings of our own Whereas a tree creates its own structure humans generally destroy other things to build with increasingly disastrous consequences In *Botanical Architecture* Paul Dobraszczyk looks closely at how elements of plants seeds roots trunks branches leaves flowers and canopies compare with and constitute human made buildings Given the omnipresence of plant life in and around our structures Dobraszczyk argues that we ought to build as much for plants as for ourselves understanding that our lives are always totally dependent on theirs *Botanical Architecture* offers a provocative and original take on the relationship between ecology and architecture
