Harper, 2024-11-12 If you re like most of us there s more than one aspect of your life that could use some unfucking More often than not the challenges of mental health physical health boundaries sex and relationships are tied together in a big overwhelming tangle And when it comes to sorting ourselves out it s hard to know where to begin But take heart this comprehensive resource from bestselling author Dr Faith G Harper makes that process a whole lot easier Combining the tools and insights from four of her most essential titles **Unfuck Your Brain Unfuck Your Body Unfuck Your Intimacy and Unfuck Your Boundaries** this omnibus empowers you to tackle all parts of your life on your way to becoming your best self If you re new to Dr Faith s work this is the perfect introduction to her accessible funny science based approach to getting your act together **Prepare Today Survive Tomorrow** LG Wellington, 2014-04-01 This book will introduce you to a wealth of information on emergency preparation and will provide your family or organization with important strategies insights tips guidelines and lists on how to prepare for a disaster Survival planning is nothing more than realizing a disaster could happen that would put everyone in a survival situation and with that in mind taking steps to increase your chances of survival Although helping others is certainly meaningful worthwhile and in some cases necessary the main emphasis of all household or organization team members should be to purchase gather and store resources and supplies for your own team members Everyone must be encouraged and expected to provide for themselves We have been encouraged through religious education scientific and government media to prepare for these future events **Meet Your Sexual Mind** Mark Abraham, 2011-06-14 The Interactions Between Instinct and Intellect and its Impact on Human Behavior Length 200 Pages The paradoxes of human sexuality although self evident have been difficult to explain through the conventional understanding of the human mind A legitimate question to ask would be if polygamy is natural for humans then why are there so many rules against it worldwide And if humans by nature are monogamous then why is there so much infidelity in the all of the cultures of the world All beings instinctively are either polygamous or monogamous and they behave accordingly However humans demonstrably are both at the same time This too can only be understood through understanding the differences between the make up of human mind as compared to that of

all the rest of the beings In that except for humans every aspect of all beings including their sexual conduct is driven by their instincts and instincts alone This renders their mind a single polar entity however the human mind alone being equipped to both instincts and intellect is bipolar As such each of these two mental forces of instincts and intellect issues its own command pertaining to human sexuality It just so happens that humans are instinctively polygamous however through the application of human intellect and reasoning and for practical reasons for millennia they have devised harsh rules against free sex to regulate peoples sexual activities through marriage These sever punishments are still enforced in many parts of the world even today And that was mostly designed to impose monogamy although some societies also allowed polygamy Thus instincts and intellect issue two opposite commands and that renders humans as the only species that is sexually confused This inner contradiction often leads to infidelity that severely affects the committed relationships among many couples The same phenomenon also creates a fascinating psychology of its own what is commonly known sexual fantasy Through this people in the privacy of their mind and in their imagination practice polygamy without committing adultery that partially satisfies both realms of the mind

**Disaster Risks and Hazards**

Rosemary Kasimba,Innocent Chirisa,2025-07-18 This book discusses disaster risks and hazards as well as measures to increase people s resilience The 21st Century has experienced a number of disasters that resulted in hampering socio economic development the loss of lives and property hence they are a threat to sustainable development Disaster risk management efforts and practices have failed to arrest the underlying drivers of increased global risk No country is immune to disaster risk thus resilience has become a critical component of disaster management It provides an opportunity to confront the social ecological foundations of disasters However it has been vaguely conceptualised and lacks a concrete approach to operationalization Some developing countries are gradually coming to realise that preparedness hazard mapping prediction risk and vulnerability assessment and planning are critical for increasing resilience and reducing losses following disasters A paradigm shift is required from reactionary to proactive measures in disaster management as the later focuses more on increasing the resilience of the community Zimbabwe s disaster management policy of 1979 is in the process of review following Cyclone Idai in March 2019 and the Corona Virus 19 COVID 19 Furthermore the consequences of climate change disaster are being felt with across the world particularly developing countries whose preparatory measures for such disasters are inadequate Disasters have become inevitable and no country is every country is vulnerable to them In the event of these disasters the vulnerable people are at risk and are affected more as majority of them are not able to cope In developed countries measures are in place to assist the vulnerable in the event that a disaster strikes However Zimbabwe being a developing country is not able to deal with unpredictable disasters due to lack of resources hence the need for it to adopt mitigatory and transformative measures to reduce the impact of any form of disasters

**The Culture of Sex in Ancient China** Paul R. Goldin,2001-10-31 The subject of sex was central to early Chinese thought Discussed openly and seriously as a fundamental topic of human speculation it was an important source of imagery and terminology that informed the classical Chinese conception of social and political relationships This sophisticated and long standing tradition however has been all but neglected by modern historians In The Culture of Sex in Ancient China Paul Rakita Goldin addresses central issues in the history of Chinese attitudes toward sex and gender from 500 B C to A D 400 A survey of major pre imperial sources including some of the most revered and influential texts in the Chinese tradition reveals the use of the image of copulation as a metaphor for various human relations such as those between a worshiper and his or her deity or a ruler and his subjects In his examination of early Confucian views of women Goldin notes that while contradictions and ambiguities existed in the articulation of these views women were nevertheless regarded as full participants in the Confucian project of self transformation He goes on to show how assumptions concerning the relationship of sexual behavior to political activity assumptions reinforced by the habitual use of various literary tropes discussed earlier in the book led to increasing attempts to regulate sexual behavior throughout the Han dynasty Following the fall of the Han this ideology was rejected by the aristocracy who continually resisted claims of sovereignty made by impotent emperors in a succession of short lived dynasties Erudite and immensely entertaining this study of intellectual conceptions of sex and sexuality in China will be welcomed by students and scholars of early China and by those with an interest in the comparative development of ancient cultures [Treatment Programs for Sex Offenders](#) Edward M.
