Now in its 23rd year the Tax Book is the authoritative commentary on the Taxes Consolidation Act 1997 I can t remember when I have been so impressed before by a book What is astonishing is the sheer simplicity of the idea behind it It is so simple as to amount to genius What the tax book does is to take the Consolidated Taxes Act 1997 and produce what appears to be an identical copy of that Act Each section and schedule each subsection and paragraph of the original Act appears Looking at it you would be convinced you are reading the actual legislation It is only when you do read it that you realise it couldn t be the legislation Because you can actually understand it What Alan Moore has done is to rewrite the Consolidated Taxes Act 1997 subsection by subsection in plain English I don t believe I have ever seen a book which is laid out to look exactly the same as the original legislation and which instead of attempting a global birds eye view of each section tackles each subsection in turn and explains exactly what that subsection is intended to mean This version of the legislation is so much more readable I unreservedly recommend this book to every tax practitioner Frank Carr KPMG Irish Tax Review Alan Moore BA BComm MBA CTA has 40 years experience in tax VAT CAT Income Tax Corporation Tax and CGT He was consultant to Revenue on the Taxes Consolidation Act 1997 He is founder and CEO of Tax World Ltd **RHCSA Red Hat Enterprise Linux 8:** Asghar Ghori,2020-01-10 Covers Red Hat Enterprise Linux 8 Covers ALL official exam objectives for the RHCSA exam based on Red Hat Enterprise Linux 8 Equally good for self study and in class training 81 Step by Step exercises 70 Do It Yourself Challenge Labs 375 Check Your Understanding Questions initial interaction with the system and basic commands compression and archiving file editing and manipulation standard and special permissions file searching and access controls user monitoring and authentication files users groups and password aging bash shell features and startup files processes and task scheduling basic and advanced software administration techniques system boot process and bootloader kernel management and system initialization logging and system tuning basic and advanced storage management tools and solutions local and remote file systems and swap regions network device and connection configuration time synchronization and hostname resolution the secure shell service and firewall and SELinux controls Each chapter highlights the major topics and relevant exam objectives at the beginning and ends with review questions answers and Do It Yourself challenge labs Throughout the book figures tables screen shots examples and exam tips have been furnished to support
