Pharmacological Basis of Acute Care Yoo Kuen Chan, Kwee Peng Ng, Debra Si Mui Sim, 2014-11-19 This book is the 4th in a series of Acute Care books written with the aim to address the NEEDS of health care providers when handling the acutely ill patients Globally it has become apparent that the study of pharmacology and subsequent clinical training has not always adequately equipped young doctors with the ability to administer drugs to their patients safely and confidently particularly in the critically ill patient Compounding this issue is the lack of resource material related to these pharmacological concepts contained in one book that can help health care providers to understand and manage drug therapy in the acute situation In spite of progressively newer and more developed protocols guidelines algorithms and many other

books addressing the technical aspects of what needs to be done most health care providers still find it difficult to grasp the basic pharmacological knowledge and rationally deliver the CARE that is required in the acute phase of patient management. The editors/authors have therefore aimed for a book that highlights topics and pharmacological issues pertinent to management of patients in their hour of need. This is a multi-author book but the style has been guided by 3 editors. The editors have used a different perspective that of normalizing abnormal physiological processes with pharmacological agents to address the GAPS in a bedside to bench approach. The details are pared down but important principles/concepts are emphasized.

Target AIIMS PG Entrance Madhan Jeyaraman, Naveen Jeyaraman, 2018-08-21 entrance examinations of AIIMS. The material is prepared after a thorough scanning of the latest textbooks, journals and research.

Adjuvant Medical Care Charles Theisler, 2022-08-10 Despite tremendous gains in medical knowledge most conditions are managed rather than cured by medications. As a result countless patients seek supplemental modes of care to better control their symptoms and conditions to improve their overall wellbeing. This reality spotlights the need for adjuvant medical procedures. Adjuvant medical care refers to any supportive therapy that enhances the outcome of medical measures already in place. Adjuvant care does not replace primary or traditional treatments but instead serves as add on care to the initial medical treatment plan prescribed by a health care provider. The addition of one or more non-prescription therapies e.g. nutritional support over the counter remedies, home care, dietary measures, supplements etc. to the primary medical management regimen has become increasingly popular and mainstream thanks to scientific studies that have documented favorable outcomes for many patients. The verifiable scientific merit of these additional medical options demonstrates their usefulness in the treatment of many medical conditions. The purpose of this handbook is to provide support to doctors and patients who are interested in safe and effective non-prescription and non-pharmacological medical therapies for specific conditions to minimize symptoms and optimize recovery and quality of life. Helps doctors and patients discover additional therapies that can reduce pain, advance health outcomes, minimize complications and disability and extend life. Presents safe, reliable and practical options that are available to reduce symptoms, maximize recovery and positively augment the management of a variety of conditions. Provides medical insight into less traditional yet often effective supportive options for enhancing and optimizing patient response to care. This book is a valuable resource for both doctors and patients who are committed to achieving the best possible medical outcomes through a variety of coordinated approaches.

Das, Tithishri Kundu, Emily G. McDonald, 2025-08-13 In the labyrinthine theatre of human affliction the lesion emerges simultaneously as cipher and proclamation an encrypted testament inscribed upon the tissues by the perturbations of disordered physiology awaiting both the interpretive acuity of diagnostic discernment and the transformative agency of therapeutic intervention The Alchemy of Lesions Decoding Disease and Orchestrating Resolution aspires to transcend the artificially imposed demarcations that have too long separated pathology from pharmacology instead weaving them into a unified epistemological tapestry wherein morphological decipherment and pharmacodynamic precision converge This volume has not been conceived as a mere aggregation of facts nor as a sterile catalogue of clinical minutiae rather it is envisioned as an intellectual crucible a hermeneutic furnace in which the unrefined ore of clinical observation is subjected to the alembic of rigorous analysis and thereby transmuted into the gold of integrative understanding and curative strategy Through the prisms of histopathological morphology molecular pathobiology and the vast and ever expanding pharmacological armamentarium the reader is invited to traverse a continuum that stretches from the most subtle recognition of disease inception to the deliberate orchestration of its therapeutic undoing It is the hope of this work that it may serve as both scaffold and spur on the one hand a scholastic architecture upon which the contemporary practitioner may anchor knowledge and on the other a catalytic provocation for the generation of clinician scientists yet to come who will discern in every lesion not merely the bleak signature of morbidity but also a liminal gateway to resolution restoration and renewal
