Reconceptualising Global Finance and its Regulation Ross P. Buckley, Emiliós Avgouleas, Douglas W.

Arner,2016-03-11 Taking stock of the 2008 global financial crisis this book provides outside the box solutions for reforming international financial regulation **Troubled Asset Relief Program: Actions Needed by Treasury to Address Challenges in Implementing Making Home Affordable Programs , Factors Affecting Implementation of the Home Affordable Modification Program** Neil Barofsky,2010-11 **The Global Economic Order** Elli Louka,2020-04-24 Exploring in depth the institutions that underpin the global economy this study provides invaluable insights into why a minimum economic order has endured for so long and why states are unwilling to establish a maximum order a global safety net for all The author investigates how debt a critical component of states economic infrastructure leads to debilitating crises and how these crises undermine the economic autonomy and political independence of states **Homeland Security, its Law and its State** Christos Boukalas,2014-03-26 This book assesses the impact of post 9 11 domestic counterterrorism policy on US political life It examines political discourse law institutional architecture and state population relations and shows that homeland security is a project with wide ranging implications for democratic institutions and culture These implications are addressed through a novel approach that treats law and the state as social relations and relates developments in law to those in the state and in social dynamics On this basis the book examines the new political representations in counterterrorism discourse especially regarding the relation between the state and the population It examines the form and content of counterterrorism law the powers it provides and the structure and functions it prescribes for the state By focusing on the new Department of Homeland Security and the restructuring of the intelligence apparatus the book assesses the new intelligence led policing model Finally it examines forms of popular support and resistance to homeland security to discuss citizenship and state population relations The author concludes that homeland security has turned the US into a hybrid polity the legal and political institutions of democracy remain intact but their content and practices become authoritarian and exclude the population from politics These legal and political forms remain operative beyond counterterrorism in the context of the present economic crisis They are a permanent configuration of power This book is an indispensable companion for students of counter Terrorism and Security Studies Politics Human Rights Constitutional and Criminal Law American Studies and Criminology The European Alternative Investment Fund Managers Directive (AIFMD) Thomas Bernhardt,2013-10-29 The European Alternative Investment Fund Managers Directive AIFMD has been formulated as a response to the global financial crisis which climaxed in the collapse of Lehman Brothers on 15 September 2008 The securitisation of real estate risks that came about by launching financial innovations such as asset backed securities ABS mortgage backed securities MBS collateralised debt obligations CDO or structured investment vehicles SIV contributed particularly to the fast worldwide circulation of poisoned papers Assuming that the financial crisis of 2008 2009 was the consequence of wrongfully set incentives that primarily concerned the fund managers remuneration the European Commission followed the ideas of Jacques de Larosi re Klaus Heiner Lehne and Poul Nyrup Rasmussen and set the

legal focus on the fund managers as these entities launch and distribute financial products such as those mentioned above and also decide on the investment strategy that might bear systemic risks Due to their financial market potential and in view of the design of financial products these entities admittedly have a strong impact on the financial market development and may jointly be responsible for the realisation of systemic risks of transnational dimensions In particular in the view of a steady credit supply of the real economy the enormous transnational mobility of capital and the global competition of financial market regulations it seems doubtful whether one can identify the fund managers as those responsible for the financial market crisis of 2008 2009 This thesis highlights the history symptoms and supposed core reasons of the financial crisis of 2008 2009 and critically assesses whether the AIFMD can reach its objective to effectively contain systemic risks in the context of a globalised financial system
