

CENTRAL DOGMA OF MOLECULAR BIOLOGY

Instructions:

To simulate the process of protein synthesis by transcription and translation, you will use the codon table below to build sentences from sequences of DNA. Your group will receive one listed DNA sequence and one mutated DNA sequence to transcribe and translate. Before you begin, fill in the missing complementary base pairs in the Base Pairing Rules chart below and complete the Vocabulary Cloze Passage to make sure you understand all of the vocabulary and concepts necessary to complete this activity.

When your group receives your DNA sequences, first transcribe them into mRNA codons. From your mRNA, use the codon chart to translate your sequences into sentences. Devise a plan for figuring out what type of mutation your sequence receive by comparing your two sequences. Finally, answer the analysis questions that follow.
