The authors have also organized models and practice approaches according to the level at which they intervene to create change occupation person environment and transdisciplinary levels As their central domain of

concern the first group of occupational models or approaches have a focus on what people do in their daily lives A second group of models reflect those that intervene at the level of the person This group understands strengths and problems in occupation as evolving largely from features or qualities of the individual and the therapeutic processes suggested are directed to changing or building upon these features A third group of models and approaches focus on the psychosocial context and environment to elicit and enable a positive change in occupation In some cases these environmental models expand commonly held narrow definitions of clinical practice to encourage occupational therapists to engage in population level practices Finally a small group of models of practice are labeled as transdisciplinary Transdisciplinary models provide ways to develop conceptualizations of psychosocial practice issues practice language and approaches that are shared across disciplinary boundaries New in the completely updated Fourth Edition Contains models and practice approaches that are useful in enabling occupational therapists to address psychosocial concerns relevant to human occupation Explores the psychological emotional and social experiences of humans carried out in context and their linkages to occupational engagement and well being Puts forward practice models that focus on person level aspects of occupation in psychosocial practice Examines transdisciplinary models and their relationship to psychosocial occupational therapy concepts and practices Presents well established models and frameworks that focus on population and contextual level factors relevant to psychosocial occupational therapy practice Discusses occupational therapy intervention approaches flowing from these models relevant tools and practices and where available the supporting evidence base Included with the text are online supplemental materials for faculty use in the classroom With its updated models and a wide range of practice areas Bruce Borg s Psychosocial Frames of Reference Theories Models and Approaches for Occupation Based Practice Fourth Edition is the perfect resource for the occupational therapist student faculty and clinician or any practitioner in psychosocial and mental health
