Student Exploration: Star Spectra

Directions: Follow the instructions to go through the simulation. Respond to the questions and prompts in the orange boxes.

Vocabulary: absorption spectrum, binary star, blueshift, Cepheid variable, emission spectrum, giant star, nebula, redshift, spectrum, star

Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

1. What happens when light goes through a prism?

White light divides into several wavelengths and hues, including red, orange, yellow, and green.

This band of colors is called a **spectrum**.

2. A rainbow is an example of a spectrum. What is the sequence of colors in a rainbow?

The absence of light is depicted by the dark line. Red, green, yellow, orange, blue, purple, and black lines are all over the place.

Gizmo Warm-up

The interior of a **star** produces a continuous spectrum of light, like a rainbow. Cooler gases in the outer layers of the star absorb certain wavelengths of light, causing dark lines to appear in the spectrum. The resulting **absorption spectrum** can tell astronomers a great deal about the star.

1. On the *Star Spectra* Gizmo, turn on **Show labels**. Select star 1 to see its absorption spectrum. How many lines do you see in the spectrum?

10 lines

2. Drag the **Hydrogen** spectrum next to the **Star** spectrum so that the edges line up. Do some of the lines on the two spectra match up?

Some of them do, but not all of them.

3. Drag the **Helium** spectrum next to the **Star** spectrum. Do some lines match?

Helium does match the spectrum of stars.

4. Try out the other available spectra. Do any others have lines that match?

No, nobody else does.

Vietnam: Asia's Rising Star Brook Taylor, Sam Korsmoe, 2023-10-15 The drivers behind the world's most exciting growth story. For more than 25 years Vietnam has been one of the most dynamic countries in the world in terms of GDP growth, trade, investment, and other business metrics. The key question is whether or not the country can continue this growth for another 25 years. If it can, Vietnam will become a high income country like South Korea and Taiwan, the original Tiger Economies of Asia. Engaging in conversations about Vietnam's future is challenging. Locals are often too focused on the present while foreigners are caught up in legacy and political issues of the past. Many observers also focus on the short term, a specific economic metric, or inevitably Vietnam's political system without considering the big picture or recognizing long term trends. The authors researched and analyzed a broad range of drivers to assess a possible future for Vietnam and Vietnam Asia's Rising Star is the result of these efforts. What Others Are Saying Vietnam Asia's Rising Star should be read by anyone with an interest in Vietnam and anyone else with an interest in the future of Asia. Carlyle A. Thayer, professor emeritus, University of New South Wales, Canberra.
