How many points did you plot?

This is Classwork, NOT Groupwork or Homework.

1. Plot each point in each section on the back of this sheet. Connect each point to the next point in the section with a straight line segment.

2. On a separate piece of paper, use the methods of Example 2 on page 116 of *Blitzer* to graph $y = 2x - 4$ for integer x 's from -1 to 3. Be NEAT. Label and scale axes & quadrants.

Turn in your work at the end of class for two Classwork grades.

River Riding Math Answer:

River Dynamics Bruce L. Rhoads, 2020-04-29 Rivers are important agents of change that shape the Earth's surface and evolve through time in response to fluctuations in climate and other environmental conditions. They are fundamental in landscape development and essential for water supply, irrigation, and transportation. This book provides a comprehensive overview of the geomorphological processes that shape rivers and that produce change in the form of rivers. It explores how the dynamics of rivers are being affected by anthropogenic change, including climate change, dam construction, and modification of rivers for flood control and land drainage. It discusses how concern about environmental degradation of rivers has led to the emergence of management strategies to restore and naturalize these systems and how river management techniques work best when coordinated with the natural dynamics of rivers. This textbook provides an excellent resource for students, researchers, and professionals in fluvial geomorphology, hydrology, river science, and environmental policy. Potter, Arthur Whimbey, 2013-04-03 This innovative text teaches elementary school students the techniques of critical thinking and problem solving and applies those methods to mathematical word problems. It supplements traditional fourth, fifth, and sixth grade textbooks and increases students' thinking and problem solving abilities. Students are taught the fundamentals of these processes by applying them both to simple and multi-step problems, which are provided. These problems, many written by elementary school pupils, gradually increase in difficulty, making learning both fun and stimulating. Special attention is given to typical errors and sources of conceptual difficulty. **Math plus Reading, Grades 3 - 4**, 2012-09-01 Your child's summer partner in building grade 4
