No Accident Neil Arason,2014-04-29 It is possible to eliminate death and serious injury from Canada's roads In other jurisdictions the European Union centres in the United States and at least one automotive company aim to achieve comparable results as early as 2020 In Canada though citizens must turn their thinking on its head and make road safety a national priority Since the motor vehicle first went into mass production the driver has taken most of the blame for its failures In a world where each person's safety is dependent on a system in which millions of drivers must drive perfectly over billions of hours behind the wheel failure on a massive scale has been the result When we neglect the central role of the motor vehicle as a dangerous consumer product the result is one of the largest human made means for physically assaulting human beings It is time for Canadians to embrace internationally

recognized ways of thinking and enter an era in which the motor vehicle by product of human carnage is relegated to history No Accident examines problems related to road safety and makes recommendations for the way forward Topics include types of drivers human related driving errors related to fatigue speed alcohol and distraction and roads pedestrians cyclists and public transit road engineering motor vehicle regulation auto safety design and collision avoidance technologies such as radar and camera based sensors on vehicles that prevent crashes This multi disciplinary study demystifies the world of road safety and provides a road map for the next twenty years *Adventure Guide to the Canadian Rockies* Brenda
