Large-Scale Studies in Mathematics Education James A. Middleton,Jinfa Cai,Stephen Hwang,2015-05-05 In recent years funding agencies like the Institute of Educational Sciences and the National Science Foundation have increasingly emphasized large scale studies with experimental and quasi experimental designs looking for objective truths Educational researchers have recently begun to use large scale studies to understand what really works from developing interventions to validation studies of the intervention and then to efficacy studies and the final scale up for large implementation of an intervention Moreover modeling student learning developmentally taking into account cohort factors issues of socioeconomics local political context and the presence or absence of interventions requires the use of large data sets wherein these variables can be sampled adequately and inferences made Inroads in quantitative methods have been made in the psychometric and sociometric literatures but these methods are not yet common knowledge in the mathematics education community In fact currently there is no volume devoted to discussion of issues related to large scale studies and to report findings from them This volume is unique as it directly discusses methodological issue in large scale studies and reports empirical data from large scale studies **Encountering Algebra** Cecilia Kilhamn,Roger Säljö,2019-07-03 The book

reports a comparative research project about algebra teaching and learning in four countries Algebra is a central topic of learning across the world and it is well known that it represents a hurdle for many students The book presents analyses built on extensive video recordings of classrooms documenting the first introduction to symbolic algebra students aged 12 to 14 While the content addressed in all classrooms is variables expressions and equations the teaching approaches are diverse The chapters bring the reader into different algebra classrooms discussing issues such as mathematization and social norms the role of mediating tools and designed examples and teacher beliefs By comparing classrooms new insights are generated about how students understand the algebraic content how teachers instruct and how both parties deal with difficulties in learning elementary algebra The book also describes a research methodology using video in search of taken for granted aspects of algebra lessons
