1 | AUTHOR'S INTRODUCTION

How do we remake our world into a new and better one? Philosophers have been surprisingly reticent on this question. Theories of justice tell us what an ideally just society would look like. Ethical theories tell us the morally right thing to do. But philosophers have virtually no such comparably systematic theories of social change, that is, theories telling us the right way to bring about a just society. An underlying interest in social change animates the growing number of what Sally Haslanger (2013) calls “ameliorative” projects that have taken root in the so-called ‘core’ areas of metaphysics, epistemology, and language, just as it has promoted greater attention to real-world oppression within ethics, moral psychology, aesthetics, social and political philosophy. This article shows that social change deserves to be recognized as an area of philosophical study in its own right.

“The Causes and Patterns of Change” (pp. 14–44) in Charles Harper and Kevin Leicht, (2018) *Exploring Social Change*, Taylor and Francis, Milton Park.

An accessible chapter that provides the social scientific perspective on processes of social change, and is useful for illustrating the scale and depth of transformative social change needed.

Wright, Erik Olin (2010) *Envisioning Real Utopias*, Verso, London.

One of the few texts in analytic philosophy that directly addresses the problem of social change, laying out a taxonomy of three main strategies (ruptural, interstitial, symbiotic) for change.
