Getting to the

Common Core Sharon L. Spencer, Sandra Vavra, 2015-01-01 The Common Core Standards have recently been adopted in most states across the nation and teachers are in the process of getting to the core of these standards Teaching to standards is not a new concept teachers have adapted to new standards every few years for quite some time And teachers are adaptable as can be seen in this book We are writing this book to demonstrate how teachers use research based strategies to meet Common Core Standards while still focusing on students Our goal is to help teachers visualize students in action as other teachers describe the implementation of research based strategies in their own classrooms show student work samples and provide reflections of student success in achieving the standards Many Common Core Standards books focus on the standards but our approach focuses on strategies that engage the students in the classroom showing how different teachers at varying grade levels have used the strategies to meet the standards With this focus we believe that teachers gain a new and positive perspective on approaching the new standards and see the flexibility of strategies for meeting standards across subject areas We have examined research on the strategies with the purpose of giving teachers a brief description of why

these strategies work before giving actual examples from classrooms We also work closely with teachers in the public schools and have our finger on the pulse of what is happening in the public schools one of the current stressors being unpacking the Common Core Standards This book actually focuses on practice We begin by laying out a rationale in our first chapter The Core Values of Education Then each chapter focuses on a strategy including 1 a brief description about the research supporting each strategy and 2 several examples from different grade levels which include a description of how the strategy was used student work samples and a reflection on the use of the strategy The research descriptions are fairly short because while we believe professional educators aka teachers in this case should know the research that supports practice we know they are not typically interested in long diatribes about the research

Bridging the Literacy Achievement Gap, Grades 4-12 Dorothy S. Strickland, Donna E. Alvermann, 2004-05-26 This book addresses critical issues related to pre adolescent and adolescent literacy learners with a focus on closing the achievement gap Despite efforts by educators and policymakers during the past several decades certain groups of students primarily African American students English language learners and students from low income homes continue to underperform on commonly used measures of academic achievement Too often teachers and administrators lack both proper preparation and good ideas to confront these issues

Teaching for Equity in Complex Times Jamy Stillman,Lauren Anderson,2017 In schools serving high concentrations of bilingual learners it can be especially challenging for teachers to maintain commitments to equity minded instruction while meeting the demands of new educational policies including national standards This book details how one school integrated equity pedagogy into a standards based curriculum and produced exemplary levels of achievement As the authors illustrate however the school s dual commitment to bilingual education and standards based reform engendered numerous complex tensions Specifically the authors describe teachers attempts to balance demands for rigor and content coverage within their high performing school

and with their diverse student population They identify specific tensions that emerged around the following issues the degree of academic struggle that is generative for student learning and the point at which such struggle becomes counterproductive the holding of high expectations for all learners and the provision of differentiated student centered learning experiences the CCSS emphasis on engaging students around more complex text and the contested determination of what constitutes complexity in text and in teaching the influence of high stakes accountability on school norms and practices including teachers interpretations and enactment of new national standards the performance pressures placed on teachers in today s educational policy context This book offers welcome guidance on dialogical teaching to socially committed teachers and teacher educators Linda Valli University of Maryland A must read for those interested in transformative teacher learning Kris D Gutierrez Carol Liu Professor GSE University of California Berkeley *Common Core State Standards for Grades 4-5* Michelle Manville, 2013-09-19 Common Core State Standards for Grades 4 5 Language Arts Instructional Strategies and Activities is designed to help teachers teach CORE standards using research based effective instructional strategies in combination with ready to use activities These strategies include identifying similarities and differences writing summaries and taking notes creating non linguistic representations and suggestions for homework and practice There are a variety of suggested texts as well as identified text exemplars that can easily be used with the suggested activities The activities accommodate most teaching styles and can be used by the new teacher as well as the experienced teacher with very little advanced preparation required While the activities in each chapter are listed as single suggestions they can be used individually or combined to strengthen your current units as you implement the Common Core State Standards in your daily planning and instruction Secondary Lenses on Learning Participant Book Catherine Miles Grant, 2009-08-11 This participant book in combination with the facilitator s guide forms a comprehensive professional development program designed to improve the efforts of site based mathematics leadership teams for middle and high schools Secondary Lenses on Learning prepares leaders to explore concepts in middle and high school algebra as a window into content instruction and assessment You will learn how to assess the strengths and needs of your mathematics programs set goals and generate plans for ongoing improvement by engaging in extended explorations and conversations based on readings problem based activities cases and videos **Teaching Tools for the 21st Century** Carolyn Coil, 2005
