Report: Education Transparency International,2013-10-08 Corruption and poor governance are acknowledged as major impediments to realizing the right to education and to reaching the Millennium Development Goal of universal primary education by 2015 Corruption not only distorts access to education but affects the quality of education and the reliability of

research findings From corruption in the procurement of school resources and nepotism in the hiring of teachers to the buying and selling of academic titles and the skewing of research results major corruption risks can be identified at every level of the education and research systems Conversely education serves as a means to strengthen personal integrity and is a critical tool to address corruption effectively The Global Corruption Report GCR is Transparency International's flagship publication bringing the expertise of the anti corruption movement to bear on a specific corruption issue or sector The Global Corruption Report on education consists of more than 70 articles commissioned from experts in the fields of corruption and education from universities think tanks business civil society and international organisations The Global Corruption Report on education and academic research will provide essential analysis for understanding the corruption risks in the sector and highlight the significant work that has already been done in the field to improve governance and educational outcomes This will be an opportunity to pull together cutting edge knowledge on lessons learnt innovative tools and solutions that exist in order to fight corruption in the education sector

Equity in Discourse for Mathematics Education Beth Herbel-Eisenmann, Jeffrey Choppin, David Wagner, David Pimm, 2011-12-09 This book explores the connection between the ways people speak in mathematics classrooms and their opportunities to learn mathematics The words spoken heard written and read in mathematics classrooms shape students sense of what mathematics is and of what people can do with mathematics The authors employ multiple perspectives to consider the means for transformative action with respect to increasing opportunities for traditionally marginalized students to form mathematical identities that resonate with their cultural social linguistic and political beings

eLearning for Quality Teaching in Higher Education Nan Yang, 2020-04-20 This book explores the impact of eLearning on the quality of teaching in higher education focusing on three main issues university teachers perception of quality teaching their strategies for achieving quality teaching in practice and interventions that design and implement online collaborative activities in a large class The book argues that if eLearning targets the real problems in practice and is appropriately designed and implemented it can improve the teaching quality at universities It also demonstrates the complexity of teachers perception of quality teaching and contextual factors that affect teaching practice and quality Further it explores university teachers perception of quality teaching in Italy the UK and China an aspect that is rarely addressed in the literature and reveals why the impact of ICTs on university teaching is not as great as in other fields by explaining the issues that threaten the quality of day to day teaching Lastly it confirms that traditional lecturing combined with online collaborative activities improves the quality of teaching compared to traditional lecturing alone As such this book is a necessary and important resource for the research community

Measuring Multiple Intelligences and Moral Sensitivities in Education Kirsi Tirri, Petri Nokelainen, 2012-01-01 In this book we introduce several sensitivity measures in educational contexts that can be used in research education and self evaluations In Chapter 1 we discuss the framework of Howard

Gardner's Multiple Intelligences theory and introduce our Multiple Intelligences Profiling Questionnaire. We present the psychometrical qualities of the instrument with empirical data sets of children, youth and adults. In Chapter 2 the Spiritual Sensitivity Scale is introduced with the theoretical framework it is connected to. The existence of spiritual intelligence has been a widely debated issue and not everybody is ready to call advanced thinking in religious or spiritual domains as intelligence. This has guided us to use the term sensitivity which is easier to justify than intelligence in these areas of human behavior. In Chapter 3 we introduce the Environmental Sensitivity Scale which is quite close to the possible intelligence of naturalist suggested by Gardner. In Chapter 4 Ethical Sensitivity Scale is introduced followed by Emotional Leadership Questionnaire in Chapter 5. All these scales have a solid theoretical framework and earlier empirical work to support the instrument building. Chapter 6 introduces Intercultural and Interreligious Sensitivity Scales with their theoretical frameworks and earlier empirical work. Following each chapter we have included a ready to use version of the questionnaire and SPSS syntax to compute factors. A commentary by Dr Seana Moran compliments the book and challenges the readers to further reflect the meaning of education in supporting holistic development of learners in their life long journey. We have authored this book to contribute to this goal and hope it will be used in the hands of researchers, teachers and students in their mutual effort to grow and to learn new things in life.

Handbook of Research on Establishing Digital Competencies in the Pursuit of Online Learning Podovšovnik, Eva, De Giuseppe, Tonia, Corona, Felice, 2023-07-14. After two years of forced changes in the educational system and shifting to a new model where online learning became a reality, students and teachers gained a lot of experience and new insights into online learning. Thus it is relevant for educators, managers of schools and developers of online applications to understand what was learned during the pandemic in order to adapt to the new situation. The Handbook of Research on Establishing Digital Competencies in the Pursuit of Online Learning considers important lessons learned about online teaching during the pandemic, the experiences of educators and the perspectives of students and teachers. The book also assists educators in designing their learning process for it to be more student and teacher oriented. Covering key topics such as technology, digital skills and distance learning, this reference work is ideal for industry professionals, administrators, policymakers, principals, researchers, academicians, scholars, instructors and students.

Sustainability in Public Procurement, Corporate Law and Higher Education Lela Melon, 2023-12-12

Contemporary changes in law and policy at the global level to efficiently answer to environmental and social issues correspond to the traditional approach of limiting the regulatory and policy changes to a singular field or discipline, tackling the inherent unsustainability of corporate laws or incentivising the offering of sustainable finance to stimulate the transition towards sustainable practices. This book provides a new viewpoint and approach of simultaneously regulating seemingly non-connected fields in order to provide a fertile ground for a truly organic change towards sustainable outcomes. It addresses

diverse questions of sustainable transition of the three specific fields to support sustainable practices in public procurement private market transaction and in educating future business leaders and legal experts by incorporating sustainable concerns as the underlying guiding principles of their conduct It translates scientific findings into a practical format that can be used by diverse stakeholders searching for information and solutions in their respective professional fields The underlying assumption is that a simultaneous action in the three respective fields of public procurement corporate law and higher education brings about more coherent and interconnected results that incentivise further action and changes towards sustainable practices The book furthers the idea of policy coherence by building upon the findings in the field of public procurement corporate law and practice and higher education curricula By identifying the barriers in the three respective fields for sustainable action and proposing solutions for either eliminating or minimising those barriers at the EU level the book calls for further changes in the respective fields as well as for considering the spillover effects of these policies on other fields
