

DIAL SETTING of the VENNER **Autopoint** TIME SWITCH

Pull off clear plastic cover to gain access to dial.

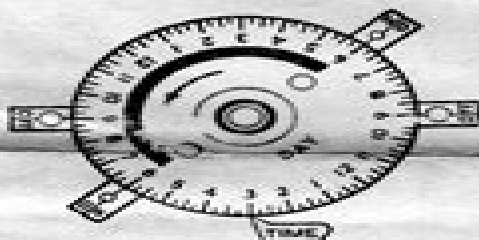

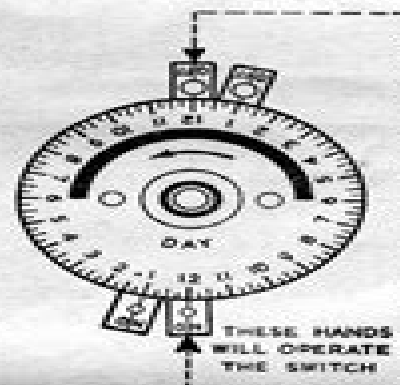

Set hands by simply pushing them round dial to required switching times—white line in centre of hand against time on dial.

RED hands switch **ON**
BLACK hands switch **OFF**

Short switching periods are obtained by overlapping the hands. Set red ON hand to time required, then superimpose black OFF hand above it. (Minimum ON period—30 minutes).

When only one daily switching period is required, set red ON and black OFF hands in pairs. Only the first hand in each pair will operate the switch.

Having set hands to required switching times, turn complete dial anticlockwise (as shown by arrow) until TIME pointer shows correct time of day. The hands are held firm by friction washers, and will not move unless reset manually.

N.B.—When the Autopoint is disconnected from the existing socket-outlet, the clock will stop. Remember to reset the dial to the correct time of day when putting the Autopoint back into service.
