Heritage and Archaeology in the Digital Age Matthew L. Vincent, Víctor Manuel López-Menchero Bendicho, Marinos Ioannides, Thomas E. Levy, 2017-11-10 This book examines how computer based programs can be used to acquire big digital cultural heritage data curate and disseminate it over the Internet and in 3D visualization platforms with the ultimate goal of creating long lasting digital heritage repositories The organization of the book reflects the essence of new technologies

applied to cultural heritage and archaeology Each of these stages bring their own challenges and considerations that need to be dealt with The authors in each section present case studies and overviews of how each of these aspects might be dealt with While technology is rapidly changing the principles laid out in these chapters should serve as a guide for many years to come The influence of the digital world on archaeology and cultural heritage will continue to shape these disciplines as advances in these technologies facilitate new lines of research serif The book is divided into three sections covering acquisition curation and dissemination the major life cycles of cultural heritage data Acquisition is one of the fundamental challenges for practitioners in heritage and archaeology and the chapters in this section provide a template that highlights the principles for present and future work that will provide sustainable models for digital documentation Following acquisition the next section highlights how equally important curation is as the future of digital documentation depends on it Preservation of digital data requires preservation that can guarantee a future for generations to come The final section focuses on dissemination as it is what pushes the data beyond the shelves of storage and allows the public to experience the past through these new technologies but also opens new lines of investigation by giving access to these data to researchers around the globe Digital technology promises significant changes in how we approach social sciences cultural heritage and archaeology However researchers must consider not only the acquisition and curation but also the dissemination of these data to their colleagues and the public Throughout the book many of the authors have highlighted the usefulness of Structure from Motion SfM work for cultural heritage documentation others the utility and excitement of crowdsourcing as a citizen scientist tool to engage not only trained students and researchers but also the public in the cyber archaeology endeavor Both innovative tools facilitate the curation of digital cultural heritage and its dissemination Together with all the chapters in this volume the authors will help archaeologists researchers interested in the digital humanities and scholars who focus on digital cultural heritage to assess where the field is and where it is going

Frontiers of Digital Transformation Kazuya Takeda, Ichiro Ide, Victor Muhandiki, 2021-05-18 Proposing the concept of real world data circulation RWDC this book presents various practical and industry related studies in human mechanical and social data domains RWDC is a new field of study established by the information technology IT community In the real world the speed of data transmission between computers surpassed that of human communications long ago and has since expanded exponentially As a result the origin of the majority of data has become non human mechanical or natural sources in fact humans are merely the source of a small part of the current data explosion Such expanding data transmission does not

simply consist of single source destination pairs but actually circulates over a complex network connecting numerous sources and destinations Such circulation is an important aspect of the underlying systems Based on this concept in order to tame and control the massive amount of data originating from non human sources the authors have been considering the insertion of acquisition analysis and implementation processes in the flow of data circulation This book introduces the outcome of the RWDC degree program organized at Nagoya University Japan collecting contributions from graduate students enrolled in the program from various research fields targeting diverse applications Through examples of RWDC the resulting creation of social value is illustrated This book will be useful not only for those working on the topics discussed but also to anyone who is interested in RWDC digital transformation and Industry 4 0

Protection of Historical Constructions Federico M. Mazzolani,Raffaele Landolfo,Beatrice Faggiano,2025-05-04 This book gathers the peer reviewed papers presented at the 5th International Conference on Protection of Historical Constructions PROHITECH held in Naples Italy on March 26 28 2025 The conference topics encompass structural and earthquake engineering intervention strategies materials and technologies digital documentation architecture and urban planning cultural heritage all of which represented by a showcase of case studies covering different construction materials as well as sustainability energy efficiency and adaptation to climate changes As such the book represents an invaluable up to the minute tool providing an essential overview of protection of historical constructions and offers an important platform to researchers engineers and architects
