From Heart of Stone to Heart of Flesh: Evolutionary Journey from Extremism to Moderation Zeina M. Barakat, 2017-08-24 This book examines the forces of human transformation from extremism to moderation It analyzes the ethical indicators which determine making the choice of the path to take when one is faced with crucial decisions to make The author focuses on three central values namely a moderation reflecting balance in dealing with individual and group issues b reconciliation reflecting willingness to heal wounds and repair broken relationships by showing respect for the personal and collective narrative of the other and feeling empathy and compassion for the pain and suffering of other and viewing the perspective of

the other by putting oneself in the shoes of the other c peace coexisting with the other reflecting tolerance for the beliefs and views of other These three concepts are linked together in consequential sequence with each leading to the other and eventually resulting prosperity and security

The Right Thing to Do James Rachels,1999 This collection of readings in moral theory and practical moral issues from major Western philosophers is the companion reader to *The Elements of Moral Philosophy* by the same author It explores the theories and issues introduced in that volume in their original and classic formulations

From Communication Landscapes to Bullying Battlegrounds ,2019-01-04 This volume was first published by Inter Disciplinary Press in 2014 How and why does miscommunication lead to conflict and the abuse of power What is bullying and in what sense is it an abuse of power Drawing on the expertise of twenty five researchers from academia public and private spheres this work discusses these and a wide range of other questions relating to communication conflict bullying and the abuse of power Although ideally in a perfect world these questions would not even arise even if this should be Leibniz s best of all possible worlds it is still an imperfect world and so these questions arise and are in want of exploration The chapters comprising this work contain the fruit of multi and inter disciplinary discussions that occurred in an atmosphere of mutual respect and cooperation with the common goal of better understanding and advancing knowledge on these issues

Do the Right Thing Francis J. Beckwith,1996 **The Elimination of Morality** Anne Maclean,2005-08-12 The Elimination of Morality strikes at the root of the dominant conception of what medical ethics involves It addresses the fundamental and timely question of the kind of contribution philosophers can make to the discussion of medico moral issues and the work of health care professionals It has two main objectives The first is to establish the futility of bioethics Anne Maclean challenges the conception of reason in ethics which is integral to the utilitarian tradition and which underlies the whole bioethical enterprise She argues that the enterprise is philosophically misguided philosophers do not possess moral expertise and have no special authority to pronounce upon moral issues In particular she shows that judgments about the morality of killing cannot be founded on a prior philosophical theory of the value of life The final chapter demolishes the medical model of illness and health which give exaggerated powers to the doctor and proposes a role for the philosopher in medical education which deprofessionalises life and death decisions The second objective is to expose the inadequacy of a utilitarian account of moral reasoning and moral life The author rejects the utilitarian claim that reason demands the rejection of special obligations nd argues that the utilitarian drive to reduce rational moral judgment to a single form is ultimately destructive of moral judgment as such Pure utilitarianism eliminates the essential ingredients of moral thinking

Technology, Transgenics and a Practical Moral Code Dennis R. Cooley,2009-09-28 Most philosophers still like to feel that they have a special subject matter well insulated from anything that the social scientists and scientists in general have to tell them That is not healthy for philosophy and it is all too likely to lead to an ethics that continues as of old to plead for its ultimates the fact that one is totally ineffectual being decently concealed by an impressive terminology Stevenson 1963

pp 114 5 Many so called moral theories do not even attempt to explain or justify common morality but are used to generate guides to conduct intended to replace common morality These proposed moral guides those generated by all of the standard consequentialist contractarian and deontological theories are far simpler than the common moral system and sometimes yield totally unacceptable answers to moral problems Since these philosophers who put forward these theories have usually dismissed common morality as confused they are completely unaware of the complexity involved in making moral decisions and judgments It is not surprising that many who take morality seriously and try to apply it to real problems faced by actual people are so critical of moral theory Bernard Gert 1998 p 6 As both Stevenson and Gert note ethics requires social and other sciences for by its very nature ethics is a practical enterprise **Moral Matters - Second Edition** Jan

Narveson,1999-09-21 Moral Matters is a concise and accessible look at such ethical issues as euthanasia animal rights abortion and pornography It provides a focused set of views from the unified perspective of one of North America's leading libertarian thinkers and aims to provoke thought and discussion as well as to enrich understanding For the new edition the text has been revised throughout the introduction has been greatly expanded and a new chapter on environmental issues has been added Managing Business Ethics Linda K. Trevino,Katherine A. Nelson,2010-08-23 While most business ethics texts focus exclusively on individual decision making what should an individual do this resource presents the whole business ethics story Highly realistic readable and down to earth it moves from the individual to the managerial to the organizational level focusing on business ethics in an organizational context to promote an understanding of complex influences on behavior The new Fifth Edition is the perfect text for students entering the workplace those seeking to become professionals in training communications compliance in addition to chief ethics officers corporate counsel heads of human resources and senior executives **Design, Utilization, and Analysis of Simulations and Game-Based Educational Worlds** Ferdig, Richard

E.,2013-05-31 Games and simulations have emerged as new and effective tools for educational learning by providing interactivity and integration with online resources that are typically unavailable with traditional educational resources Design Utilization and Analysis of Simulations and Game Based Educational Worlds presents developments and evaluations of games and computer mediated simulations in order to showcase a better understanding of the role of electronic games in multiple studies This book is useful for researchers practitioners and policymakers to gain a deeper comprehension of the relationship between research and practice of electronic gaming and simulations in the educational environment *What Is the Argument?* Maralee Harrell,2016-10-21 Exploring philosophy through detailed argument analyses of texts by philosophers from Plato to Strawson using a novel and transparent method of analysis The best way to introduce students to philosophy and philosophical discourse is to have them read and wrestle with original sources This textbook explores philosophy through detailed argument analyses of texts by philosophers from Plato to Strawson It presents a novel and transparent method of analysis that will teach students not only how to understand and evaluate philosophers arguments but

also how to construct such arguments themselves Students will learn to read a text and discover what the philosopher thinks why the philosopher thinks it and whether the supporting argument is good Students learn argument analysis through argument diagrams with color coding of the argument's various elements conclusion claims and indicator phrases An online mini course in argument diagramming and argument diagramming software are both freely available online Each chapter ends with exercises and reading questions After a general introduction to philosophy and logic and an explanation of argument analysis the book presents selections from primary sources arranged by topics that correspond to contemporary debates with detailed analysis and evaluation These topics include philosophy of religion epistemology theory of mind free will and determinism and ethics authors include Aristotle Aquinas Descartes Hume Kant Ryle Fodor Dennett Searle and others What Is the Argument not only introduces students to great philosophical thinkers it also teaches them the essential skill of critical thinking

Decolonisation in Universities Jonathan Jansen, 2019-08-01 In this collection of case studies and stories from the field South African scholars come together to trade stories on how to decolonise the university Shortly after the giant bronze statue of Cecil John Rhodes came down at the University of Cape Town student protestors called for the decolonisation of universities It was a word hardly heard in South Africa's struggle lexicon and many asked What exactly is decolonisation This edited volume brings together the best minds in curriculum theory to address this important question In the process several critical questions are raised Is decolonisation simply a slogan for addressing other pressing concerns on campuses and in society What is the colonial legacy with respect to curriculum and can it be undone How is the project of curriculum decolonisation similar to or different from the quest for postcolonial knowledge indigenous knowledge or a critical theory of knowledge What does decolonisation mean in a digital age where relationships between knowledge and power are shifting The book combines strong conceptual analyses with novel case studies of attempts to do decolonisation in settings as diverse as South Africa Uganda Tanzania and Mauritius Such a comparative perspective enables reasonable judgements to be made about the prospects for institutional take up within the curriculum of century old universities

Morals and Consent Malcolm Murray, 2017-09-27 How are we meant to behave And how are we to defend whatever answer we give *Morals and Consent* grounds our notion of morality in natural evolution and from that basis Malcolm Murray shows why contractarianism is a far more viable moral theory than is widely believed The scope of *Morals and Consent* has two main parts theory and application In his discussion of theory Murray defends contractarianism by appealing to evolutionary game theory and metaethical analyses His main argument is that we are not going to find morality as an objective fact in the world and that instead we can understand morality as a reciprocal cooperative trait From this minimal moral architecture Murray derives his innovative consent principle The application of the theory detailing what contractarians can or ought to say about moral matters takes up the greater portion of the work Murray offers a trenchant examination of what moral constraints we can claim concerning death abortion euthanasia and capital punishment sex

pornography prostitution and sexual assault beneficence toward present and future people animals and the environment and liberty genetic enhancement organ sales and torture By focusing on evolutionary contractarianism and the epistemic justification of our moral claims or lack thereof Malcolm Murray's *Morals and Consent* is a serious advance in the field of applied ethics and fills an important void
