Energy Systems Energy vs Development Low Carbon Economy Energy Efficiencies and Emission Reduction Key features
 Comprising over 3 500 pages in 6 volumes HCES presents a comprehensive overview of the latest research developments and practical applications throughout all areas of clean energy systems consolidating a wealth of information which is currently scattered across a wide variety of literature sources In addition to renewable energy systems HCES also covers processes for the efficient and clean conversion of traditional fuels such as coal oil and gas energy storage systems mitigation technologies for the reduction of environmental pollutants and the development of intelligent energy systems Environmental social and economic impacts of energy systems are also addressed in depth Published in full colour throughout Fully indexed with cross referencing within and between all six volumes Edited by leading researchers from academia and industry who are internationally renowned and active in their respective fields Published in print and online The online version is a single publication i e no updates available for one time purchase or through annual subscription

Making the Invisible Real
 Catherine Hartmann, 2025-05-09 How can a person learn to see a mountain as a divine mandala especially when to the ordinary eye the mountain looks like a pile of rocks and snow This is the challenge that the Tibetan pilgrimage tradition poses to pilgrims who are told to overcome their ordinary perception to see the hidden reality of the holy mountain Drawing on multiple genres of Tibetan literature from the 13th to 20th centuries including foundational narratives of holy places polemical debates about the value of pilgrimage written guides to holy sites advice texts and personal diaries this book investigates how the pilgrimage tradition tries to transform pilgrims perception so that they might experience the wondrous sacred landscape as real and materially present Catherine Anne Hartmann argues that the pilgrimage tradition does not simply assume that pilgrims experience this sacred landscape as real but instead leads pilgrims to adopt deliberate practices of seeing ways of looking at and interacting with the world that shape their experience of the holy mountain Making the Invisible Real explores two ways of seeing the pilgrim s ordinary perception of the world and the fantastic vision believed to lie beyond this ordinary perception As pilgrims move through the holy place they move back and forth between these two ways of seeing weaving the ordinary perceived world and extraordinary imagined world together into a single experience Hartmann shows us how seemingly fantastical religious worldviews are not simply believed or taken for granted but actively constructed and reconstructed for new generations of practitioners

OECD Environmental Performance Reviews: New Zealand 2017 OECD, 2017-03-20 OECD Environmental Performance Reviews provide independent assessments of countries progress towards their environmental policy objectives Reviews promote peer learning enhance government accountability and provide targeted recommendations aimed at improving environmental performance
