Based on neuroscience research, this book presents and demonstrates a Ten Enablers model as a framework to help change leaders successfully lead and manage change. It focuses on the execution of change processes within volatile and challenging emerging markets with high growth potential. The book first presents the organizational development and change research on which the model is based and discusses the basic neuroscience principles. It then introduces a systematic model of the ten enablers, taking readers through the process of change from considering the ethos prior to embarking on it, including engagement of stakeholders up to the final phase where change leaders exit the process or the organization. It highlights this circular process through several step-by-step illustrations supported by examples from emerging markets.
