This book develops a quantitative stock market investment methodology using financial indicators that beats the benchmark of S P500 index To achieve this goal an ensemble of machine learning models is meticulously constructed incorporating four distinct algorithms support vector machine k nearest neighbors random forest and logistic regression These models all make use of financial ratios extracted from company financial statements for the purposes of predictive forecasting The ensemble classifier is subject to a strict testing of precision which compares it to the performance of its constituent models separately Rolling window and cross validation tests are used in this evaluation in order to provide a comprehensive assessment framework A risk off filter is developed to limit risk during uncertain market periods and consequently to improve the Sharpe ratio of the model The risk adjusted performance of the final model supported by the risk off filter achieves a Sharpe ratio of 1.63 which surpasses both the model's performance without the filter that delivers Sharpe ratio of 1.41 and the one from the S P500 index of 0.80 The substantial increase in risk

adjusted returns is accomplished by reducing the model's volatility from an annual standard of deviation of 15.75% to 11.22% which represents an almost 30% decrease in volatility

Fusion Analysis: Merging Fundamental and Technical Analysis for Risk-Adjusted Excess Returns V. John Palicka CFA CMT, 2011-12-16. Question: What is the best way to make money on your investments? Answer: There is no one single quick answer. That's why you need Fusion Analysis. One of the fastest growing trends in investment today, fusion analysis combines the best of all possible strategies into one powerful unified system. Based on the now famous NYIF investment course taught by renowned portfolio manager V. John Palicka CFA CMT, this all in one guide shows you how to manage fundamental trends like gold investing and small cap investing, master technical tools such as price forecasts and market data histories, recognize behavioral patterns like fear, greed, impulse and sentiment, utilize quant systems to adapt, evolve and balance your investments. Whether you're a hedge fund manager, a portfolio professional or an individual investor, you'll find a complete range of techniques that can work together for you. By combining the very best of all investment approaches, Palicka's integrated system provides the perfect fusion of theory and practice. You'll learn how to capitalize on the repeating nature of investment psychology and avoid the emotional fallout that can rattle the market. You'll learn how to strengthen and diversify your portfolio with strategic buys such as gold and other metals. You'll learn how to identify future growth companies, evaluate real estate opportunities and evaluate your assets for the bigger picture. Once you fuse a strategy together, you can adjust your risks for the highest return possible. In today's market, you need more than one strategy to grow your investments. You need the full range potential of Fusion Analysis.
