Typically this leaves a gap between the development of a company's strategy and its implementation. The business scorecard however provides a more balanced view by looking at not just financial concerns but also customers, internal business processes and learning and growth. But it is not just a system of performance measurement by focusing on future potential success; it can be used as a dynamic management system that reinforces, implements and drives corporate strategy forward. In this book, the authors draw on their extensive experience with scorecard projects to provide a step-by-step method for introducing the Balanced Scorecard into an organization. This is done through the use of some of the most important practical examples in existence with case studies from ABB, Coca-Cola, Electrolux, British Telecom, Nat West, Skandia and Volvo. The desired strategic control system using scorecards that is presented focuses on creating and communicating a total comprehensive picture to all members of the organization from the top down, a long-term view of what the company's strategic objectives really are, how to make use of knowledge gained through experience and the required flexibility of such a system to cope with the fast-changing business environment. This book will provide senior and operational managers, consultants and business academics with a comprehensive view of emerging Balanced Scorecard practice supported by both business advice and a theoretical foundation. Reflections on the relations between the Balanced Scorecard and other areas such as TQM, information systems and intellectual capital and knowledge management are also made. Business Strategy
