pursue it by making artwork There are two sections in the dissertation The first section lays out theoretical characterizations of indescribable intelligibility that arise from my ethnographic findings I argue the potential for anthropology of exploring indescribable intelligibility through a line of reflective criticism of its scientific reductionism I highlight qualities of artistic and ethnographic relationships that are irreducible to a human intellectuality that is dominated by structural discourse of culture s even though those qualities work as a core faculty of artwork which is a cultural product I call these qualities gap an otherness within the individual and argue that the gap creates room for creativity when a human engages him herself with his her object s of creation which can lead to a humans creation of the self and culture anew In the second part I consider my theory of gap and its creative potential within two case studies of art students in pursuit of something which the first student looked for within her self in order to express it through her work The second student found something while including a complex interpersonal relationship between her friends in her art making Comparing my ethnographic engagement with artists to their art making relationships with their artistic subject objects I suggest the potential of ethnography to evoke its own something or the indescribable intelligible as a communicative vehicle for cultural creation
