

GUIDELINES FOR PROJECT WORK FOR SEMESTER VI STUDENTS

As part of the curriculum during the last Semester, students are required to take up project work for the successful completion of the BCA Course

This project will be assessed on the submission of the soft copy of project report, as well as presentation and the Viva.

1. The CD of project report has to be prepared in Ms Word (as .doc)
2. A soft copy on word document has to be submitted at the institute at the time of Viva.

1.1 WHAT IS A PROJECT WORK?

It is an intensive study on a topic. It explores the subject in depth and elucidates information about the problem investigated, the methods used to solve the problem, the results of the investigation and the conclusions inferred and a set of recommendations that can be implemented. Project can be descriptive or explanatory. In a descriptive study we study the existing systems/ prevailing conditions of the topic.

1.2 WHAT CAN BE STUDIED IN A PROJECT?

The project taken for study can be related to a particular organization. A project should preferably be conducted in the organization where the student is employed.

1.3 How to start the project?

Very project needs a SDLC(Software development life cycle) . We are following latest Sdlc(Agile)

Agile SDLC model is a combination of iterative and incremental process models with focus on process adaptability and customer satisfaction by rapid delivery of working software product. Agile Methods break the product into small incremental builds. These builds are provided in iterations. Each iteration typically lasts from about one to three weeks. Every iteration involves cross functional teams working simultaneously on various areas like

Creative Project Guidelines for Students and Teachers with Some Reference to Project Work Within the Bachelor of Education Course Vaughan Bowie, Deirdre Russell-Bowie, 1996 Student Community Service, 1988

Personalizing the High School Experience for Each Student Joseph DiMartino, John H. Clarke, 2008-04-21 Why is it that so many students see high school as a prison sentence to be endured rather than a time to learn and grow According to DiMartino and Clark many high school students feel invisible and isolated They don't see the relevance of what they are being taught and they don't see how their classes are preparing them for success as adults This book offers a new vision for high schools a vision that puts students at the center of their learning Personalized high schools engage students by allowing them to plan and develop their own pathways through school based on their talents interests and aspirations The book describes six promising practices that are emerging in high schools Guided Personalized Learning Teachers act as advisors to small groups of students over two to six years to review personal learning plans assist in course selection and discover opportunities in the community Personal Learning Plans Students meet regularly with parents advisors mentors and peers to review progress and plan next steps Personalized Teaching Teachers differentiate instruction to allow students to explore different aspects of the subject and produce authentic work that shows their understanding Community Based Learning Active involvement in the community helps clarify a student's purpose and defines the steps necessary to achieve successful adult roles Personalized Assessment Rather than grades and tests scores the work itself portfolios exhibitions and student led conferences shows what the students have learned Personalizing school systems Some schools are moving past the Carnegie unit and focusing instead on helping each student achieve specified competencies often through learning experiences that the students themselves have helped design These six practices can improve learning for all students by engaging them in shaping their own high school experience and discovering how the academic skills they learn in school can have meaning in the world they will negotiate as adults *Implementation Science in Nursing* Linda Roussel, Patricia Thomas, 2024-06-01 A timely resource that shows faculty students and clinicians how to bring about and sustain change Implementation Science in Nursing A Framework for Education and Practice provides theoretical information and practical application for evidence based practice EBP in health care The most challenging but crucial part of EBP is implementation where the practice change is piloted evaluated integrated and sustained Implementation Science in Nursing A Framework for Education and Practice focuses on the implementation process which is the study of methods and strategies that promote the methodical uptake of research findings and EBPs into routine practices to ultimately improve patient care quality safety and outcomes Drs Linda A Roussel and Patricia L Thomas have combined both didactic teaching methods with real life exemplars in the text to help readers learn the elements of implementation science and its application Other important features include Excellent exemplars and sample assignments for educators In depth discussions on implementation science theories models and

frameworks applied to real life scenarios Thorough explanations of evidence based practice EBP quality improvement QI implementation science IS and dissemination science DS The latest literature and thinking on implementation science With Implementation Science in Nursing A Framework for Education and Practice nursing professionals and students in Doctor of Nursing Practice programs will learn the tools techniques and strategies used to advance quality initiatives and improve patient and population health
