It has been fairly traumatic for everyone and every organization over the last couple of years as we have had to deal with the coronavirus pandemic It has certainly been a shock to the economic system of the world from which many are still recovering Equally it has affected social systems and the environment the effects of which are still being felt and will

be felt for some time to come In addition there has been a fairly general economic crisis around the world as people struggle and adapt to the new environment Certainly there have been and will be changes which are likely to become permanent While recovering from one crisis however another is becoming more significant as climate change and its effects start to become ever more apparent So it seems inevitable that difficult times will continue into the future This book therefore sets out to examine aspects of the changes to corporate and institutional behaviour which have come about by the difficult times of needing to deal with past and future crises The international origins of the contributors to this volume make this very original taking some of the best ideas from around the world This approach is based on the tradition of the Social Responsibility Research Network SRRNet.org which in its 20 year history has sought to broaden the discourse and to treat all research as inter related and relevant to business This tradition has always been to explore the subject widely and to seek relevant solutions while also sharing best practice

Geometry of

CR-Submanifolds and Applications Bang-Yen Chen,Mohammad Hasan Shahid,Gabriel-Eduard Vîlcu,2025-08-29 This book attempts to present a comprehensive survey of the geometry of CR submanifolds The theory of submanifolds is one of the

most interesting topics in differential geometry The topic is introduced by Aurel Bejancu as a generalization of holomorphic and totally real submanifolds of almost Hermitian manifolds in 1978 Afterward the study of CR submanifolds became a very active research subject Organized into 22 chapters the book starts with basic knowledge of Riemannian manifolds and submanifolds almost Hermitian manifolds and their subclasses Hopf fibration symmetric spaces and a general inequality for submanifolds in complex space forms in Chaps 1 and 2 Later it presents the main results on CR submanifolds in Kaehler manifolds the basic inequalities associated with CR submanifolds in Kaehler manifolds and several theories and results related to Kaehler manifolds in Chaps 3 11 Further the book discusses the basics of almost contact metric manifolds and their subclasses CR submanifolds of Sasakian trans Sasakian and quasi Sasakian manifolds with a particular attention on the normal CR submanifolds in Chap 12 It also investigates the contact CR submanifolds of S manifolds the geometry of submersions of CR submanifolds and the results on contact CR warped product submanifolds in Chaps 16 18 20 In Chapter 19 we discuss submersions of CR submanifolds The book also presents some recent results concerning CR submanifolds of holomorphic statistical manifolds In particular it gives the classification of totally umbilical CR statistical submanifolds in holomorphic statistical manifolds as well as a Chen Ricci inequality for such submanifolds Chapter 21 In the last chapter we present results on CR submanifolds of indefinite Kaehler manifolds and their applications to physics
