The Political Economy of the Welfare State in Latin America Alex Segura-Ubiergo, 2007-06-25 This book is one of the first attempts to analyze how developing countries through the early twenty first century have established systems of social protection and how these systems have been affected by the processes of globalization and democratization The book focuses on Latin America to identify factors associated with the evolution of welfare state policies during the pre globalization period prior to 1979 whilst studying how globalization and democratization have affected governments fiscal commitment to social spending In contrast with the Western European experience more developed welfare systems evolved in countries relatively closed to international trade while the recent process of globalization that has swept the region has put substantial downward pressure on social security expenditures Health and education spending has been relatively protected from greater exposure to international markets and has actually increased substantially with the shift to democracy      *Handbook on the Political Economy of Social Policy* Bent Greve, Amílcar Moreira, Minna van Gerven, 2024-05-02 Research in social policy has been greatly influenced by the emergence of modern political economy in the late 1970s The Handbook on the Political Economy of Social Policy offers a systematic yet comprehensive framework for understanding how concepts theoretical

The Oxford Handbook of Transformations of the State Stephan Leibfried, Evelyne Huber, Matthew Lange, Jonah D. Levy, Frank Nullmeier, John D. Stephens, 2015. This Handbook offers a comprehensive treatment of transformations of the state from its origins in different parts of the world and different time periods to its transformations since World War II in the advanced industrial countries, the post Communist world and the Global South. Leading experts in their fields from Europe and North America discuss conceptualizations and theories of the state and the transformations of the state in its engagement with a changing international environment as well as with changing domestic economic, social and political challenges. The Handbook covers different types of states in the Global South: failed to predatory rentier and developmental; in different kinds of advanced industrial political economies: corporatist, statist, liberal, import substitution industrialization; and in various post Communist countries: Russia, China, successor states to the USSR and Eastern Europe. It also addresses crucial challenges in different areas of state intervention: from security to financial regulation, migration, welfare, states, democratization and quality of democracy, ethno nationalism and human development. The volume makes a compelling case that far from losing its relevance in the face of globalization, the state remains a key actor in all areas of social and economic life, changing its areas of intervention, its modes of operation and its structures in adaption to new international and domestic challenges.
