

# Well-Child Visits

It is important for all children to attend well-child visits and receive scheduled vaccines during the COVID-19 pandemic. Vaccines prevent measles, mumps, polio, hepatitis and other preventable viral infections. These services are especially important for newborns and children under the age of two.

## Newborn visits check important things like:

- Your baby's weight
- Your baby's feeding
- Jaundice

## Visits at 2, 4, 6, 9, 12, 15, 18 and 24 months are important to:

- Check physical growth
- Check brain growth
- Track milestones
- Get vaccinations
- Screen for lead in blood

To ensure access to care during the COVID-19 pandemic, Healthy Connections Medicaid is covering well-child visits and screenings through telehealth for Medicaid members. However, the South Carolina Department of Health and Human Services supports the American Academy of Pediatrics' (AAP) recommendation that well-child visits for children under age two receive in-person care, when possible.

## Visits for children older than two years of age:

- Should be held according to schedule
- May be completed through telehealth, check with your pediatrician
- If you use telehealth, a follow-up, in-person visit and any vaccination should be scheduled as soon as possible
- Four and 11-year olds should still receive important vaccines, even if the well-visit is held via telehealth

Many South Carolina pediatric offices have made changes to protect patients and families including:

- Shifting timing for well and sick visits
- Changing the office design or location depending on the type of visit
- Allowing curbside visits for certain services
- Offering well-care visits through telehealth
