OPERATION

Adjust the guide wire so as to lay along heads, wheel
hubs, straight edges, etc. The driver can also be used free
hand or with a curved pattern designed template.

Adjustment made in wheel tip assembly by means of
screws, which can be adjusted in each of the four
positions.

Operate driver on flat material. The material is held
in place by the guide wire and the driver is pushed
along.

You will notice that your hand should be held so as
to keep the driver from jumping or wobbling.

Remember the driver should be held so that the
face of the driver is against the material. The driver
can be used on curved surfaces by adjusting the
screws on the wheel tip assembly.

If stripe is blurred or in the wrong location due to error
in setting guide adjustment, remove stripe at once before
it dries, and set up over again, remove stripe at once and
start over.

Larger white stripes are made by making two outside
lines and filling in with a brush. Double or multiple stripes
are made by adjusting the guides or straight edge. Dou-
ble or multiple stripes are more effective and pleasing
than a single large wide band.

Consult your paint dealer for material recommendations
