Philosophical Sovietology Helmut Dahm, J.E. Blakeley, George L. Kline, 2012-12-06 On February 24 25 1956 in a closed session of the 20th Congress of the Communist Party of the Soviet Union Nikita S Khrushchev made his now famous speech on the crimes of the Stalin era That speech marked a break with the past and it marked the end of what J M Bochenski dubbed the dead period of Soviet philosophy Soviet philosophy changed abruptly after 1956 especially in the area of dialectical materialism Yet most philosophers in the West neither noticed nor cared For them the resurrection of Soviet philosophy even if believable was of little interest The reasons for the lack of belief and interest were multiple Soviet philosophy had been dull for so long that subtle differences made little difference The Cold War was in a frigid period and reinforced the attitude of avoiding anything Soviet Phenomenology and existentialism were booming in Europe and analytic philosophy was king on the Anglo American philosophical scene Moreover not many philosophers in the West knew or could read Russian or were motivated to learn it to be able to read Soviet philosophical works The launching of Sputnik awakened the West from its self complacent slumbers Academic interest in the Soviet Union grew

Weather Modification Georg Breuer, 1980-02-14 **Studies in Soviet Thought** J.M. Bochenski, J.E. Blakeley, 2012-12-06 Early in 1958 a number of research projects on Soviet philosophy were started at the Institute of East European Studies at the University of Fribourg Switzerland under the direction of the undersigned At present they are all completed or nearly so and their results are described in 18 different volumes In spite of the fact that all of them have been already published or soon will be mostly in German it has been thought worthwhile to present their main conclusions in the form of short English reports This book contains in the main these reports Only the two programmatic papers my own and that of Dr Buchholz and the study of Dr Dahm are not direct results of the above mentioned projects But it will be clear to everyone that they too are closely connected with the subject envisaged and are written from a similar point of view It will perhaps be convenient to briefly formulate this standpoint All the writings included here are concerned with recent i e mainly post Stalinist developments in

Soviet philosophy where Soviet is taken in the wide meaning of the word covering also Marxism Leninism in Communist countries other than the Soviet Union All the authors started with the assumption that there are interesting aspects to these more recent developments There was also a common assumption that only specialized work on first hand sources can be of relevance in this field

Fictive Orders and Feminine Religious Identities, 1200-1600

Alison More, 2018 Any visitor to Belgium or the Netherlands is immediately struck by the number of convents and beguinages begijnhoven in both

major cities and small towns Their number and location in urban centres suggests that the women who inhabited them once held a prominent role Despite leaving a visible mark on cities in Europe much of the story of these women known variously as beguines tertiaries klopjes recluses and anchoresses remains to be told Instead of aspiring to live as traditional religious they transcended normative assumptions about religion and gender and had a very real impact on their religious and secular worlds The sources for their tale are often fragmentary and difficult to interpret However careful scrutiny allows their voices to be heard Drawing on an array of sources including religious rules sermons hagiographic vitae and rapiaria Fictive Orders and Feminine Religious Identities traces the story of pious laywomen between the thirteenth and sixteenth centuries It both emphasizes the innovative roles of women who transcended established forms of institutional religious life and reveals the ways in which historiographical habits have obscured the dynamic and fluid nature of their histories By highlighting the development of irregular and extraregular communities and tracing the threads of monasticisation that wove their way around pious laywomen this book draws attention to the vibrant and dynamic culture of feminine lay piety that persisted from the later middle ages onwards

Shakespearean Genealogies of Power

Anselm Haverkamp, 2010-10-18 Shakespearean Genealogies of Power proposes a new view on Shakespeare's involvement with the legal sphere as a visible space between the spheres of politics and law and well able to negotiate legal and political even constitutional concerns Shakespeare's theatre opened up a new perspective on normativity His plays reflect even create history in a new sense on the premises of the older conceptions of historical and legal exemplarity examples cases and instances are to be reflected rather than treated as straightforwardly didactic or salvific Thus what comes to be recognized reflected and acknowledged has a disowning alienating effect whose enduring aftermath rather than its theatrical immediacy counts and remains effective In Shakespeare

the law gets hold of its normativity as the problematic efficacy of unsolved or rarely ever completely solved problems on the stage of the theatre the law has to cope with a mortgage of history rather than with its own success story The exemplary interplay of critical cultural and legal theory in the twentieth century between Carl Schmitt and Hans Kelsen Walter Benjamin and Ernst Kantorowicz Hans Blumenberg and Giorgio Agamben Robert Cover and Niklas Luhmann found in Shakespeare's plays its speculative instruments A Dictionary of English Etymology Hensleigh Wedgwood, 1862 **Soviet Historiography of Philosophy** Evert van der Zweerde, 1997-11-30 Scientific history of philosophy was one of the professional branches of Soviet philosophy and a place where philosophical culture was preserved in an often hostile environment Situated between the ideological exigencies of the Soviet system with its Marxist Leninist theoretical foundation and the need for an objective account of philosophy's past Soviet history of philosophy displays the characteristic features of Soviet philosophy as a whole including a forceful reappearance of its Hegelian background This book is the only Western monograph on this important part of Soviet philosophy thus filling the last main gap in Western Philosophical Sovietology At the same time it offers the first survey of Soviet philosophy after the disappearance of the Soviet system itself embarking on an historical and meta philosophical investigation of Soviet philosophical culture The book will be of interest to students of Soviet and Russian philosophy historians of philosophy and specialists in Soviet studies **Biographical Dictionary of Twentieth-Century Philosophers** Stuart Brown, Diane Collinson, Robert Wilkinson, 2012-09-10 This Biographical Dictionary provides detailed accounts of the lives works influence and reception of thinkers from all the major philosophical schools and traditions of the twentieth century This unique volume covers the lives and careers of thinkers from all areas of philosophy from analytic philosophy to Zen and from formal logic to aesthetics All the major figures of philosophy such as Nietzsche Wittgenstein and Russell are examined and analysed The scope of the work is not merely restricted to the major figures in western philosophy but also covers in depth a significant number of thinkers from the near and far east and from the non European Hispanic language communities The Biographical Dictionary also includes a number of general entries dealing with important schools of philosophy such as the Vienna Circle or currents of thought such as vitalism These allow the reader to set the individual biographies in the context of the philosophical history of the period With entries written by over 100 leading philosophy scholars the Biographical Dictionary is the most comprehensive survey of twentieth century thinkers to date Structure The book is structured alphabetically by philosopher Each entry is identically structured for ease of access and covers nationality dates and places of birth and death philosophical style or school areas of interest higher education significant influences main appointments main publications secondary literature account of intellectual development and main ideas critical reception and impact At the end of the book a glossary gives accounts of the schools movements and traditions to which these philosophers belonged and thorough indexes enable the reader to access the information in several ways by nationality by major areas of contribution to philosophy e.g. aesthetics by major influences on the thinker concerned

Dawkins brought us his engaging memoir of the first 35 years of his life from early childhood in Africa to publication of *The Selfish Gene* in 1976 when he shot to fame as one of the most exciting new scientists of his generation. In *Brief Candle in the Dark* he continues his autobiography following the threads that have run through the second half of his life so far and homing in on the key individuals, institutions and ideas that inspired and motivated him. He paints a vivid picture coloured with wit, anecdote and digression of the twenty-five postgraduate years he spent teaching at Oxford. He pays affectionate tribute to past colleagues and students, recalling with characteristic wry humour the idiosyncrasies of an establishment steeped in ancient tradition and arcane ritual while also recording his respect for the profound commitment to learning and discovery that lies at its core. He invites us to share the life of a travelling scientist from fieldwork on the Panama Canal to conferences of stratospheric eminence in exotic locations in the company of some of the most prominent and some of the most eccentric of the world's scientific luminaries. And he describes his experiences with his many publishers, television producers, interviewers and partners in debate, not least in the heady period when, after publication of *The God Delusion* in 2006, he is dubbed the world's most outspoken and controversial atheist. Most important of all, for the first time, he reviews with fresh and stimulating insights the evolving narrative of his ideas about science over the course of his highly distinguished career as thinker, teacher and writer. In *Brief Candle in the Dark* we are invited to enter with him a constantly stimulating world of discovery and to meet a fascinating cast of exceptional characters described by the talented pen of one of the most exceptional of them all.
