Applying Language Science to Language Pedagogy José Manuel Igoa, Montserrat Sanz, 2011-12-08 This book establishes a bridge between current research in Linguistics and Psycholinguistics and language pedagogy in the classroom It reformulates the debates about teaching approaches by calling the reader's attention to discoveries about the structure of grammar the universals of language mind processes while comprehending producing and storing language and facts about learning The popularization of L2 teaching brought with it a need to find efficient teaching methods Debates have hinged mainly around the alleged advantages of communicative vs traditional methods However most approaches have their roots in linguistic and psychological theories that have been questioned by language researchers Some language teachers are probably unaware of these advances and to that extent continue to adhere to teaching approaches mainly based on intuitions Consequently evaluating materials may be often performed in rather uninformed circumstances The book contains chapters on relevant issues by leading researchers classified into three main areas The editors contribute a chapter to each of these sections about the implications for second language teaching This book facilitates an approximation between researchers in the theoretical and experimental fields of language and those responsible for innovation in language teaching It is designed so that L2 teachers can adopt and adjust the knowledge drawn from the book to their particular environment and group of students

**Free School Teaching** Kristan Accles Morrison, 2012-02-01 Free School Teaching is the personal and professional journey of one teacher within the American educational system Faced with mounting frustrations in her own traditional middle school classroom and having little success in resolving them Kristan Accles Morrison decided to seek out answers first by immersing herself in the academic literature of critical education theory and then by turning to the field While the literature on progressive education gave her hope that things could be different and better for students locked into America's traditional education system she wanted to find a firsthand example of how these ideas played out in practice Morrison found a radical free school in Albany New York that embodied the ideas found in the literature and over a period of three months she observed and documented differences between alternative and traditional schools In trying to reconcile the gap between those systems Morrison details the lessons she learned about teachers students curriculum and the entire conception of why we educate our children
