Jennifer, Marshall, Delia, 2018-02-09 Around the world more young people than ever before are attending university Student  
numbers in South Africa have doubled since democracy and for many families higher education is a route to a better future  
for their children But alongside the overwhelming demand for higher education questions about its purposes have intensified

parents civil society and policy makers We know from macro research that South African graduates generally have good  
employment prospects But little is known at a detailed level about how young people actually make use of their university  
experiences to craft their life courses And even less is known about what happens to those who drop out This accessible book  
brings together the rich life stories of 73 young people six years after they began their university studies It traces how going  
to university influences not only their employment options but also nurtures the agency needed to chart their own way and to  
engage critically with the world around them The book offers deep insights into the ways in which public higher education is  
both a private and public good and it provides significant conclusions pertinent to anyone who works in and cares about  
universities
