Information Technology in Health Care: Socio-Technical Approaches 2010 Christian Nøhr, Jos Aarts, 2010-06-15 Ten years ago two landmark reports were published by the Institute of Medicine on human error in medicine and the quality chasm It seems appropriate then that the fourth international conference Information Technology in Health Care should re visit these themes now to examine how safer systems can be designed and implemented to improve patient safety This book presents the proceedings of that conference Many policies and programs have been initiated internationally to stimulate the use of electronic health care and record systems Unfortunately these do not always run smoothly For example a study of electronic prescribing systems in seven western countries showed that the uptake in hospitals was only 20% and some studies have indicated that electronic systems may even introduce more errors instead of reducing them Of the 28 submitted papers presented here seven deal with patient safety eight address various topics of system design six cover the subject of implementation and four explore patient involvement The remaining three papers cover the theme of the conference in a broader perspective Offering insights into how improved design and implementation will advance patient safety this book will be of interest to a wide range of professionals involved in all aspects of electronic health care

Context Sensitive Health Informatics: Human and Sociotechnical Approaches M.-C.

Beuscart-Zéphir, 2013-09-04 Healthcare information technologies are now routinely deployed in a variety of healthcare contexts These contexts differ widely but the smooth integration of IT systems is crucial so the design implementation and

evaluation of safe effective efficient and easy to adopt health informatics involves careful consideration of both human and organizational factors This book presents the proceedings of the Context Sensitive Health Informatics CSHI conference held in Copenhagen Denmark in August 2013 The theme of this year s conference is human and sociotechnical approaches The Human Factors approach is distinctly design driven and aims to optimize performance safety and users sense of well being associated with their use of a system through the application of user centered systems design and evaluation The papers and presentations included here are grouped under the topics patients and IT usability test and evaluation work tasks and related contexts human factors and simulation and context and systems design and outline theories and models for studying contextual issues and insights related to how health information technologies can be better designed to accommodate different healthcare contexts Healthcare organizations health policy makers and regulatory bodies globally are starting to acknowledge this essential role of human and organizational factors for safe and effective health information technology This book will be of interest to all those involved in improving the quality of healthcare worldwide
