- 1 If you are afraid of being abandoned, you may be trapped in a fear and its accompanying behaviors. You may be attracted to people who are critical, inconsistent, or abusive, and you may find yourself engaged in hurtful behaviors.
- 2 Your fear of abandonment is the result of factors that were present at your birth and in your environment. These are conditions you couldn't control as a child. Now you feel that the beliefs that formed as a result of these factors are controlling you.
- 3 A securely attached child is comforted by their caregiver when they are distressed, and they feel safe and secure with them. They are excited when their caregiver returns after a period of time apart, and they are accepting of and comforted by their caregiver's embrace.
- 4 The avoidantly attached child experiences a primary caregiver who is rejecting and at times harsh. As a result, the child depends less on her caregiver as a secure base. The child is at times aggressive toward her caregiver, and the child shows no interest in her caregiver when she returns.
