AEGEAN CIVILIZATION: C. 2000 to 1200 BCE wiped out by a volcano

The Minoans, (2000 to 1450 BCE) lived on the island of Crete in the Mediterranean Sea. Had a hereditary king (allowed the people to come and live with him at a time of attack), and they were loving people who made a living through agriculture and trade.

The Myceneans lived on Mycenea (present-day Mainland), city-state, they were pirates and thieves who made a living by stealing. They lived in the Lion Gate Palace which was designed to be a fortress, angry looking, broken, not attractive. Western Civilization 2 Test Questions True False:

Constructing Test Items Steven J. Osterlind, 1997-12-31 Constructing test items for standardized tests of achievement ability and aptitude is a task of enormous importance The interpretability of a test's scores flows directly from the quality of its items and exercises Concomitant with score interpretability is the notion that including only carefully crafted items on a test is the primary method by which the skilled test developer reduces unwanted error variance or errors of measurement and thereby increases a test score's reliability The aim of this entire book is to increase the test constructor's awareness of this source of measurement error and then to describe methods for identifying and minimizing it during item construction and later review Persons involved in assessment are keenly aware of the increased attention given to alternative formats for test items in recent years Yet in many writers' zeal to be curriculum relevant or authentic or realistic the items are often developed seemingly without conscious thought to the interpretations that may be garnered from them This book argues that the format for such alternative items and exercises also requires rigor in their construction and even offers some solutions as one chapter is devoted to these alternative formats This book addresses major issues in constructing test items by focusing on four ideas First it describes the characteristics and functions of test items A second feature of this book is the presentation of editorial guidelines for writing test items in all of the commonly used item formats including constructed response formats and performance tests A third aspect of this book is the presentation of methods for determining the quality of test items Finally this book presents a compendium of important issues about test items including procedures for ordering items in a test ethical and legal concerns over using copyrighted test items item scoring schemes computer generated items and more
