- 11. Describe the relationship between the degree of a polynomial function and its graph.
  - Degree affects the number of extreme values and the number of x-intercepts.
  - Consider: If a polynomial function is of degree  $n$ , then the graph has at most  $n-1$  extreme values and  $n$  x-intercepts.
  - Degree 1 means a straight line.
  - Degree 2 means a parabola.
  - Degree 3 means a curve that has two extreme values and three x-intercepts.
  - Degree 4 means a curve that has three extreme values and four x-intercepts.
- 12. Describe the relationship between the leading coefficient of a polynomial function and its graph.
  - The sign of the leading coefficient affects the direction that the graph of a polynomial function is as  $x$  approaches positive or negative infinity.
  - If the leading coefficient is positive, the graph of a polynomial function will rise as  $x$  approaches positive or negative infinity.
  - If the leading coefficient is negative, the graph of a polynomial function will fall as  $x$  approaches positive or negative infinity.

13. Sketch a possible graph for each function described. **Graph possible.**

<p>(a) A polynomial function of degree 2 with positive leading coefficient</p>			<p>(c) A fourth-degree polynomial function with positive leading coefficient</p>
<p>(b) A cubic polynomial function with a negative leading coefficient</p>			<p>(d) A 5<sup>th</sup>-degree polynomial function with positive leading coefficient</p>

14. Determine the number of zeros of a polynomial function that could be used to create each graph, as well as the sign of the leading coefficient.

<p>(a) Degree: <b>3</b> Leading Coefficient: <b>positive</b></p> 	<p>(b) Degree: <b>4</b> Leading Coefficient: <b>positive</b></p>

*Teaching and Learning High School Mathematics* Charlene E. Beckmann, Denisse R. Thompson, Rheta N. Rubenstein, 2009-11-02 Too many high school students faced with mathematics in courses at the level of algebra and beyond find themselves struggling with abstract concepts and unwilling to pursue further study of mathematics When students curtail their course taking in mathematics they may be impacting their college and career options Thus high school mathematics teachers have the responsibility to help students recognize the value and importance of mathematics while also designing instruction that makes mathematics accessible to all students Ball and Bass 2000 as well as other mathematics educators have recognized that mathematics teachers not only need to know mathematics content and mathematics pedagogy i e teaching strategies but they also need to know how these ideas are integrated This mathematical knowledge for teaching is the knowledge that teachers of mathematics need and it differs from the knowledge that research or applied mathematicians must know This text is designed to provide teachers with insights into this mathematical knowledge for teaching Teaching and Learning High School Mathematics is likely different from many other texts that you have used It integrates both content and pedagogy to help you develop and build your own understanding of teaching The text is designed to help you develop deep conceptual understanding of fundamental mathematics Ma 1999 so that you are able to approach mathematics from multiple perspectives with many tools Such flexibility in teaching is essential if teachers are to help all students become mathematically proficient Throughout this book you are encouraged to work in cooperative teams This strategy is designed to help you develop a mathematics learning community and build a professional network that will be a valuable resource during your professional career Hopefully you will experience the benefits of engaging in rich mathematical discussions with peers and consider how to encourage such learning environments in your own classrooms Lesson planning is another element pervasive throughout this text To help teachers plan for effective student centered lessons the Question Response Support QRS Guide is introduced in Lesson 1 1 and used throughout the remainder of the lessons The QRS Guide is a tool on which teachers may record tasks or questions Q for students expected and observed student responses R and teacher support S in the form of additional just enough questions to support students in their progress on the task In each unit teachers expand their repertoire of teaching and learning elements and strategies and incorporate these elements as they plan additional lesson segments In Unit 4 lesson planning is formally introduced as teachers put together elements from previous units into complete cohesive lesson plans
