Republic of Armenia International Monetary Fund. Middle East and Central Asia Dept.,2015-11-19 This paper discusses Armenia s Second Review Under the Extended Arrangement and Request for Waivers of Nonobservance and Rephasing Since late 2014 Armenia s economic performance has been affected by significantly weaker external conditions as the slowdown of the Russian economy the weakening of the ruble lower metals prices and the strengthening of the dollar have led to pressures on external receipts particularly remittances Performance under the program has come under strain Three performance criteria PCs were missed both at end December 2014 and end June 2015 The authorities are requesting waivers of nonobservance for the missed June and continuous PCs The IMF staff supports completion of the review **Conservation of Invertebrates in Agricultural Landscapes** Christopher Williams,Mike Gormally,James Moran,Rory Mc Donnell,2023-02-09 *Towards a New Cognitive Neuroscience: Modeling Natural Brain Dynamics* Klaus Gramann,Tzzy-Ping Jung,Daniel P. Ferris,Chin-Teng Lin,Scott Makeig,2014-10-03 Decades of brain imaging experiments have revealed important insights into the architecture of the human brain and the detailed anatomic basis for the neural dynamics supporting human cognition However technical restrictions of traditional brain imaging approaches including functional magnetic resonance tomography fMRI positron emission tomography PET and magnetoencephalography MEG severely limit participants movements during experiments As a consequence our knowledge of the neural basis of human cognition is rooted in a dissociation of human cognition from what is arguably its foremost and certainly its evolutionarily most determinant function organizing our behavior so as to optimize its consequences in our complex multi scale and ever changing environment The concept of natural cognition therefore should not be separated from our fundamental experience and role as embodied agents acting in a complex partly unpredictable world To gain new insights into the brain dynamics supporting natural cognition we must overcome restrictions of traditional brain imaging technology First the sensors used must be lightweight and mobile to allow monitoring of brain activity during free participant movements New hardware technology for electroencephalography EEG and near infrared spectroscopy NIRS allows recording electrical and hemodynamic brain activity while participants are freely moving New data driven analysis approaches must allow separation of signals arriving at the sensors from the brain and from non brain sources neck muscles eyes heart the electrical environment etc Independent component analysis ICA and related blind source separation methods allow separation of brain activity from non brain activity from data recorded during experimental paradigms that stimulate natural cognition Imaging the precisely timed distributed brain dynamics that support all forms of our motivated actions and interactions in both laboratory and real world settings requires new modes of data capture and of data processing Synchronously recording participants motor behavior brain activity and other physiology as well as their physical environment and external events may be termed mobile brain body imaging MoBI Joint multi stream analysis of recorded MoBI data is a major conceptual mathematical and data

processing challenge This Research Topic is one result of the first international MoBI meeting in Delmenhorst Germany in September 2013 During an intense workshop researchers from all over the world presented their projects and discussed new technological developments and challenges of this new imaging approach Several of the presentations are compiled in this Research Topic that we hope may inspire new research using the MoBI paradigm to investigate natural cognition by recording and analyzing the brain dynamics and behavior of participants performing a wide range of naturally motivated actions and interactions

Natural Gas Engines Kalyan Kumar Srinivasan,Avinash Kumar Agarwal,Sundar Rajan Krishnan,Vincenzo Mulone,2018-11-03 This book covers the various advanced reciprocating combustion engine technologies that utilize natural gas and alternative fuels for transportation and power generation applications It is divided into three major sections consisting of both fundamental and applied technologies to identify but not limited to clean high efficiency opportunities with natural gas fueling that have been developed through experimental protocols numerical and high performance computational simulations and zero dimensional multizone combustion simulations Particular emphasis is placed on statutes to monitor fine particulate emissions from tailpipe of engines operating on natural gas and alternative fuels

Banking's Final Exam Morris Goldstein,2017-05-30 Spurred by the success of the first stress test of US banks toward the end of the global economic crisis in 2009 stress testing of large financial institutions has become the cornerstone of banking supervision worldwide The aim of the tests is to determine which banks are adequately capitalized under severe economic shocks and to order corrective measures for those that are vulnerable In Banking s Final Exam one of the world s leading experts on banking regulation concludes that the tests administered on both sides of the Atlantic suffer from fundamental weaknesses leading to a false sense of reassurance about the safety and soundness of the banking system Some weaknesses can be corrected within the existing bank capital regime but others will require bold reforms including higher minimum capital requirements for the largest and most systemically important banks The banking industry is likely to resist these reforms but this book explains why their objections do not hold water

Software is the essential enabling means for science and the new economy It helps us to create a more reliable flexible and robust society But software often falls short of our expectations Current methodologies tools and techniques remain expensive and are not yet sufficiently reliable while many promising approaches have proved to be no more than case by case oriented methods This book contains extensively reviewed papers from the thirteenth International Conference on New Trends in software Methodology Tools and Techniques SoMeT_14 held in Langkawi Malaysia in September 2014 The conference provides an opportunity for scholars from the international research community to discuss and share research experiences of new software methodologies and techniques and the contributions presented here address issues ranging from research practices and techniques and methodologies to proposing and reporting solutions for global world business The emphasis has been on human centric software methodologies end user development techniques and emotional reasoning for an optimally harmonized performance between the design tool and the user Topics covered include the handling of cognitive issues in software development to adapt it to the user s mental state and intelligent software design in software utilizing new aspects on conceptual ontology and semantics reflected on knowledge base system models This book provides an opportunity for the software science community to show where we are today and where the future may take us

Class War Megan Erickson, 2015-09-08

What America has at stake when some children go to school hungry and others ride in 1 000 strollers In an age of austerity elite corporate education reformers have found new ways to transfer the costs of raising children from the

state to individual families Public schools tasked with providing education childcare job training meals and social services to low income children struggle with cutbacks Meanwhile private schools promise to nurture the minds and personalities of future professionals to the tune of 40 000 a year As Class War reveals this situation didn't happen by chance In the media educational success is framed as a consequence of parental choices and natural abilities In truth the wealthy are ever more able to secure advantages for their children deepening the rifts between rich and poor The longer these divisions persist the worse the consequences Drawing on Erickson's own experience as a teacher in the New York City school system Class War reveals how modern education has become the real hunger games stealing opportunity and hope from disadvantaged children for the benefit of the well to do

Child and Adolescent Development for Educators Christi Crosby Bergin, David Allen Bergin, Sue Walker, Graham Daniel, Angela Fenton, Pearl Subban, 2018-09-01 *Child and Adolescent Development for Educators* covers development from early childhood through high school This text provides authentic research based strategies and guidelines for the classroom helping future teachers to create an environment that promotes optimal development in children The authors apply child development concepts to topics of high interest and relevance to teachers including classroom discipline constructivism social emotional development and many others *Child and Adolescent Development for Educators* combines the core theory with practical implications for educational contexts and shows how child development links to the Australian Professional Standards for Graduate Teachers Case studies and real world vignettes further bridge the distance between research and the classroom Along with strong coverage of key local research such as the Longitudinal Study of Australian Children and Longitudinal Study of Indigenous children

regulations should not unnecessarily restrict the use of significant potential reserves and that domestic mining could alleviate risks associated with sourcing metals from external supply monopolies In parallel the Government has to invest in research to ensure that future domestic mining has the least possible environmental impact

Quantitative Momentum Wesley R. Gray, Jack R. Vogel, 2016-09-13 The individual investor's comprehensive guide to momentum investing Quantitative Momentum brings momentum investing out of Wall Street and into the hands of individual investors In his last book Quantitative Value author Wes Gray brought systematic value strategy from the hedge funds to the masses in this book he does the same for momentum investing the system that has been shown to beat the market and regularly enriches the coffers of Wall Street's most sophisticated investors First you'll learn what momentum investing is not it's not growth investing nor is it an esoteric academic concept You may have seen it used for asset allocation but this book details the ways in which momentum stands on its own as a stock selection strategy and gives you the expert insight you need to make it work for you You'll dig into its behavioral psychology roots and discover the key tactics that are bringing both institutional and individual investors flocking into the momentum fold Systematic investment strategies always seem to look good on paper but many fall down in practice Momentum investing is one of the few systematic strategies with legs withstanding the test of time and the rigor of academic investigation This book provides invaluable guidance on constructing your own momentum strategy from the ground up Learn what momentum is and is not Discover how momentum can beat the market Take momentum beyond asset allocation into stock selection Access the tools that ease DIY implementation The large Wall Street hedge funds tend to portray themselves as the sophisticated elite but momentum investing allows you to borrow one of their top strategies to enrich your own portfolio Quantitative Momentum is the individual investor's guide to boosting market success with a robust momentum strategy
