The New Politics of the Textbook Heather Hickman, Brad J. Porfilio, 2012-10-29 In an era when corporate and political leaders are using their power to control every aspect of the schooling process in North America there has been surprisingly little research on the impact of textbook content on students The contributors of this volume and its partner *The New Politics of the Textbook Problematizing the Portrayal of Marginalized Groups in Textbooks* guide educators school administrators academics and other concerned citizens to unpack the political social and cultural influences inherent in the textbooks of core content areas such as math science English and social science They urge readers to reconsider the role textbooks play in the creation of students political social and moral development and in perpetuating asymmetrical social and economic relationships where social actors are bestowed unearned privileges and entitlements based upon their race gender sexuality class religion and linguistic background Finally they suggest ways to resist the hegemony of those texts through critical analyses critical questioning and critical pedagogies **Lectures on Concurrency and Petri Nets** Jörg Desel, Wolfgang Reisig, Grzegorz Rozenberg, 2004-07-09 This tutorial volume originates from the 4th Advanced Course on Petri Nets ACPN 2003 held in Eichstätt Germany in September 2003 In addition to lectures given at ACPN 2003 additional chapters have been commissioned to give a well balanced presentation of the state of the art in the area This book will be useful as both a reference for those working in the area as well as a study book for the reader who is interested in an up to date overview of research and development in concurrent and distributed systems of course readers specifically interested in theoretical or applicational aspects of Petri nets will appreciate the book as well *Sequencing Theory* S. Ashour, 2012-12-06 The intent of these notes is to provide an appreciation of sequencing theory and to develop an awareness of the combinatorial aspects of sequencing problems An understanding of the ideas and concepts presented in these notes will provide the necessary

background to enable further study in this rapidly growing subject These notes have been used as a part of one semester Courses in Operations Research for both senior and first year graduate students Following the introductory chapter several classes of scheduling models are discussed in Chapter 2 Chapter 3 is devoted to discussing the characteristics of several types of criteria that have been proposed in the literature Because of the importance of the combinatorial properties in the analysis of scheduling models various combinatorial aspects are treated in Chapter 4 The primary objective of such a treatment is to provide the reader with an insight into the nature of the problem Due to the tremendous number of sequences involved and the fact that many sequences have the same schedule time statistical sampling has elicited a great deal of theoretical studies Two such studies one of which has evolved from my research are reported in Chapter 5 Many references to basic sources are cited at the end of each chapter to provide a guide for further readings I am indebted to Professor Santa Arora of the University of Minnesota who introduced me to the subject during my graduate career Effective Math
