**Homeland Security Bioterrorism Risk Assessment** National Research Council,Division on Earth and Life Studies,Board on Life Sciences,Division on Engineering and Physical Sciences,Board on Mathematical Sciences and Their Applications,Committee on Methodological Improvements to the Department of Homeland Security's Biological Agent Risk Analysis,2009-01-03 The mission of Department of Homeland Security Bioterrorism Risk Assessment A Call for Change the book published in December 2008 is to independently and scientifically review the methodology that led to the 2006 Department of Homeland Security report Bioterrorism Risk Assessment BTRA and provide a foundation for future updates This book identifies a number of fundamental concerns with the BTRA of 2006 ranging from mathematical and statistical mistakes that have corrupted results to unnecessarily complicated probability models and models with fidelity far exceeding existing data to more basic questions about how terrorist behavior should be modeled Rather than merely criticizing what was done in the BTRA of 2006 this new NRC book consults outside experts and collects a number of proposed alternatives that could improve DHS s ability to assess potential terrorist behavior as a key element of risk informed decision making and

it explains these alternatives in the specific context of the BTRA and the bioterrorism threat

**Language Learning in Children Who Are Deaf and Hard of Hearing** Susan R. Easterbrooks, 2021 Language Learning in Children who are Deaf and Hard of Hearing 2nd Edition Theory to Classroom Practice is the long awaited revision of the only textbook on primary language instruction written with classroom teachers of deaf and hard of hearing children TODs in mind It builds on the work of the previous version while providing the reader with access to the entire first version on a supplemental website An important feature of this book is that it describes four real TODs and demonstrates application of concepts discussed to the DHH children on their caseloads Up to date chapters on theory of language learning assessment and evidence based practice replace removed chapters Chapters on English and American Sign Language ASL structure and on the three major approaches listening and spoken language bilingual bimodal instruction and ASL instruction are updated The chapters on teaching vocabulary and morphosyntax how to ask and answer questions and writing language objectives for Individualized Education Plans IEPs are expanded DHH Specific examples of real cases are incorporated throughout the book Finally after a theoretical base of information on language instruction many of the chapter provide language teachers with specific examples of how to answer the question What should I do on Monday It avoids promotion of one or another philosophy presenting all and demonstrating the commonalities across classroom language instruction approaches for DHH children

*Dealing with an Angry Public* Lawrence Susskind, Patrick Field, 1996-04-17 Some portion of the American public will react negatively to almost any new corporate initiative as Disney discovered when it announced its plans to build an historical theme park in Virginia Similarly government efforts to change policy or shift budget priorities are invariably met with stiff resistance In this enormously practical book Lawrence Susskind and Patrick Field analyze scores of both private and public sector cases as well as crisis scenarios such as

the Alaskan oil spill the silicone breast implant controversy and nuclear plant malfunction at Three Mile Island They show how resistance to both public and private initiatives can be overcome by a mutual gains approach involving face to face negotiation a strategy applied successfully by over fifteen hundred executives and officials who have attended Professor Susskind's MIT Harvard Angry Public seminars Susskind and Field outline the six key elements of this approach in order to help business and government leaders negotiate rather than fight with their critics In the process they show how to identify who the public is whose concerns to address first which people and organizations must be convinced of the legitimacy of action taken and how to assess and respond to different types of anger effectively Acknowledging the crucial role played by the media in shaping public perception and understanding Susskind and Field suggest a way to develop media interaction which is consistent with the six mutual gains principles and also discuss the type of leadership that corporate and government managers must provide in order to combine these ideas into a useful whole We all need to be concerned about a society in which the public's concerns fears and anger are not adequately addressed When corporate and government agencies must spend crucial time and resources on rehashing and defending each decision they make a frustrated and angry public contributes to the erosion of confidence in our basic institutions and undermines our competitiveness in the international marketplace In this valuable book Susskind and Field have produced a strong clear framework which will help reduce these hidden costs for hundreds of executives managers elected and appointed officials entrepreneurs and the public relations legal and other professionals who advise them

**Making Babies: Biomedical Technologies, Reproductive Ethics, and Public Policy** Inmaculada de Melo-Martín, 2013-03-09 Each year roughly a million new cases of cancer appear in the US and more than 500 000 Americans die annually of premature death Although medical progress has slowed cancer mortality its incidence is increasing roughly six times faster than cancer mortality is decreasing Breast cancer in particular has been increasing about one percent each year since 1973 At least two of the factors responsible for this surge in breast cancer are women's use of medically prescribed synthetic hormones and the exposure of the entire population to chemicals such as dioxin Both exposures increase the likelihood of breast cancer Although many ethicists worry about involuntary

societal imposition of chemicals such as dioxin through industrial and agricultural processes allegedly voluntary exposures also constitute both a public health problem and a biomedical ethics difficulty Physicians recommend synthetic hormones for example to women who apparently take them voluntarily In the case of in vitro fertilization doctors prescribe hormones to induce egg production and to increase the chances of reproduction for couples who are unable to have children Despite the benefits of medical technologies such as hormone stimulation and in vitro fertilization they also carry great risks The price that childless women pay for their opportunity to have children through in vitro fertilization may be their own increased risk of diseases such as breast cancer that are hormone dependent

**Environmental Policy Analysis and Practice** Michael R Greenberg, 2008-03-13 Pressing environmental challenges are frequently surrounded with stakeholders on all sides of the issues Opinions expressed by government agencies the private sector special interests nonprofit communities and the media among others can quickly cloud the dialogue leaving one to wonder how policy decisions actually come about In *Environmental Policy Analysis and Practice* Michael R Greenberg cuts through the complicated layers of bureaucracy science and the public interest to show how all policy considerations can be broken down according to six specific factors 1 the reaction of elected government officials 2 the reactions of the public and special interests 3 knowledge developed by scientists and engineers 4 economics 5

ethical imperatives and 6 time pressure to make a decision The book is organized into two parts with the first part defining and illustrating each one of these criteria Greenberg draws on examples such as nuclear power pesticides brownfield redevelopment gasoline additives and environmental cancer but focuses on how these subjects can be analyzed rather than exclusively on the issues themselves Part two goes on to describe a set of over twenty tools that are used widely in policy analysis including risk assessment environmental impact analysis public opinion surveys cost benefit analysis and others These tools are described and then illustrated with examples from part one Weaving together an impressive combination of practical advice and engaging first person accounts from government officials administrators and leaders in the fields of public health and medicine this clearly written volume is poised to become a leading text in environmental policy
