## Unit 4 Animals: Structure and Function

### Unit Preparation Questions (Assessing Readiness)

(Student textbook pages 396–9)

1. absorption, digestion, respiration, biosynthesis, excretion, egestion, secretion, movement, irritability, homeostasis, and reproduction
2. c
3. Students may suggest osmosis or diffusion. Some students may also suggest active transport (endocytosis, exocytosis). All of these answers are acceptable.
4. d
5.  $6\text{CO}_2$ ,  $6\text{H}_2\text{O}$
6. A is the cell membrane, which separates the inside of the cell from the environment within the body, and controls the flow of materials into and out of the cell. B is the cytoplasm, which includes the cytosol, organelles, and other life-supporting materials. C is a mitochondrion, from which energy is released from glucose to fuel cell activities.
7. c
8. a. Both processes move molecules across the cell membrane.  
b. Osmosis is the process whereby water moves through the cell membrane so that the numbers of water molecules on the inside and outside of a cell are the same. Diffusion is the movement of molecules from areas where there are higher concentrations of molecules to areas where there are lower concentrations of molecules.  
Sample answer:

9. Sweating is an example of osmosis. The gas exchange in our lungs is an example of diffusion.
10. a. A sperm cell requires the most food energy, because the sperm tail moves back and forth like a whip.  
b. Skin cells have the least number of mitochondria of the three types because they require the least amount of energy. Skin cell functions do not include movement, whereas muscle cells must provide energy for muscles to contract and relax.

11. c

12. In multicellular organisms, cell division is needed for tissue and organ growth, and to repair and replace cells in the organism.

13. Answers should include three of: blood cells, skin cells, muscle cell, nerve cell, bone cell

**Evolution Driven by Organismal Behavior** Rui Diogo, 2017-03-08 This book proposes a new way to think about evolution The author carefully brings together evidence from diverse fields of science In the process he bridges the gaps between many different and usually seen as conflicting ideas to present one integrative theory named ONCE which stands for Organic Nonoptimal Constrained Evolution The author argues that evolution is mainly driven by the behavioral choices and persistence of organisms themselves in a process in which Darwinian natural selection is mainly a secondary but still crucial evolutionary player Within ONCE evolution is therefore generally made of mistakes and mismatches and trial and error situations and is not a process where organisms engage in an incessant suffocating struggle in which they can't thrive if they are not optimally adapted to their habitats and the external environment Therefore this unifying view incorporates a more comprehensive view of the diversity and complexity of life by stressing that organisms are not merely passive evolutionary players under the rule of external factors This insightful and well reasoned argument is based on numerous fascinating case studies from a wide range of organisms including bacteria plants insects and diverse examples from the evolution of our own species The book has an appeal to researchers students teachers and those with an interest in the history and philosophy of science as well as to the broader public as it brings life back into biology by emphasizing that organisms including humans are the key active players in evolution and thus in the future of life on this wonderful planet **TECHNIQUES AND**

**METHODS IN BIOLOGY** GHATAK, K. L., 2010-12-30 This comprehensive and accessible text discusses all the topics prescribed for the students of Life Sciences taking the National Eligibility Test NET Besides the book would also be useful for undergraduate and postgraduate students of Biotechnology and postgraduate students of Botany and Zoology The book discusses spectroscopy which forms the core of modern research be it physical sciences or life sciences and microscopy which is now an indispensable analytical tool in Biological Science with all its different forms It also illustrates radioactivity and related phenomena so as to justify their widespread applications in modern biological medical and chemical researches The book evaluates the role of statistics in biological as well as physiological medical phenomena and systematically analyses electrophysiological methods histochemical and immuno techniques and molecular biology Key Features Questions and their answers are interspersed throughout the text so as to make the discussion clear and meaningful Use of mathematical calculations and formulas is kept to a minimum *Mathematical Snapshots* H.  practices middle school science can capture the interest and energy of adolescent students and expand their understanding  
 of the world around them Resources for Teaching Middle School Science developed by the National Science Resources  
 Center NSRC is a valuable tool for identifying and selecting effective science curriculum materials that will engage students  
 in grades 6 through 8 The volume describes more than 400 curriculum titles that are aligned with the National Science  
 Education Standards This completely new guide follows on the success of Resources for Teaching Elementary School Science  
 the first in the NSRC series of annotated guides to hands on inquiry centered curriculum materials and other resources for  
 science teachers The curriculum materials in the new guide are grouped in five chapters by scientific area Physical Science  
 Life Science Environmental Science Earth and Space Science and Multidisciplinary and Applied Science They are also  
 grouped by type core materials supplementary units and science activity books Each annotation of curriculum material  
 includes a recommended grade level a description of the activities involved and of what students can be expected to learn a  
 list of accompanying materials a reading level and ordering information The curriculum materials included in this book were  
 selected by panels of teachers and scientists using evaluation criteria developed for the guide The criteria reflect and  
 incorporate goals and principles of the National Science Education Standards The annotations designate the specific content  
 standards on which these curriculum pieces focus In addition to the curriculum chapters the guide contains six chapters of  
 diverse resources that are directly relevant to middle school science Among these is a chapter on educational software and  
 multimedia programs chapters on books about science and teaching directories and guides to science trade books and  
 periodicals for teachers and students Another section features institutional resources One chapter lists about 600 science  
 centers museums and zoos where teachers can take middle school students for interactive science experiences Another  
 chapter describes nearly 140 professional associations and U S government agencies that offer resources and assistance
