

# Mystery Book Report

Mysteries are fictional stories that are usually realistic. They are about a mysterious event which is not explained or a crime that is not solved until the end of the story to keep the reader in suspense.

1. Read a mystery chapter book of at least 100 pages. Please do not read any Brownie Children's Note the Clues, Figure It Out, Clue Books, or High Rise Detectives books as the reading level are too low for fourth graders. Nancy Drew, Hardy Boys, and Doreen Rappaport books are great reads, but visit the local library and ask the librarian for suggestions.

2. Create a "Mystery Skeleton"

## Directions

Tell about the "body" of the story you read this month. Put together a "skeleton" model to use in your story presentation. I'll hang it up when you're finished. Use index cards or stiff paper. Put the skeleton together with string or yarn.

**Head** Draw and color the face of the main character. Write your name on back of the head and describe the main character in full sentences and your best guesses.

**Chest/Upper Torso** Draw & color the setting where and when the story takes place. Write at least one sentence (in narrative) that describes the setting.

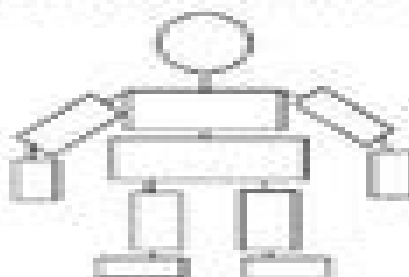

**Abdomen/Hips** Write 3-5 sentences in your best narrative that explain the main problem or mystery in the book.

**Upper Arms** Write the names of other important characters. Add how each relates to the problem or main character in full, narrative sentences.

**Lower Arms** Write at least 3 other problems in complete, narrative sentences, the main character must solve on the way to solving the main problem.

**Legs** Write ways the character gets out of the mystery or solves the main problem – the climax and solution.

**Feet** Write one thing you liked about the book in a sentence in narrative on each foot and explain why.

The Mystery of Skeleton Cave Richard Kauffman, 2024-08-13 What the young detectives need to do now is discover what is causing the dreadful screams coming from the mysterious house on Michigatta Ridge Since the property and the mansion are being purchased by a family in nearby Shelton permission to search the house shouldn't be too difficult to obtain for the real estate agent is Mr Allen Alan Allen's father Now the young detectives can finally gain access to the old mansion and solve all the mysteries right Well maybe not While exploring about the old place Laura and Julie Ann two new characters run into a few unexpected problems First Laura disappears through a secret panel near the old grandfather clock located at the foot of the stairs falling to the cellar floor rendering her unconscious There's a cellar Up to then no one knew a cellar existed However this one is quite unique in that it holds secrets one being a human skeleton which Laura not knowing what she'd stumbled onto disassembles while groping about in the dark understory into which she had fallen Another odd find hiding in the darkness of the previously unknown basement is a Wells Fargo stagecoach A bill of lading sometimes called a waybill found later shows the stagecoach once carried sixteen bags of gold each weighing eight pounds The missing gold could be hidden somewhere in the house or cellar At least the group now known as JABAL Force an acronym standing for Julie Alan Barbara and Laura thinks it should be so Even stranger than a skeleton and a stagecoach being in the cellar is the apparition Barbara later discovers that becomes known as the Dancing Miner Most of these mysteries become somewhat unraveled in the end but the source of the terrifying screams continues to haunt the group

Skeleton Lake Jasper Quincy, AI, 2025-03-04 Skeleton Lake unravels the mystery of Roopkund Lake a high altitude Himalayan lake famed for the hundreds of human skeletons surrounding its shores Rejecting simple explanations the book argues that these remains are not the result of a single catastrophic event but rather multiple incidents occurring over centuries This conclusion comes from synthesizing Earth Sciences Geography and History to examine archaeological findings DNA analysis radiocarbon dating and climatological research The book presents a detailed investigation beginning with the lake's geography and the discovery of the skeletons DNA analyses revealed that the skeletons belong to distinct groups including individuals with Mediterranean ancestry and local South Asians while radiocarbon dating spans centuries The book uniquely integrates climatological research exploring extreme weather events in the Himalayas that may have contributed to these deaths By combining these diverse pieces of evidence Skeleton Lake provides a comprehensive and accessible account of this intriguing unsolved mystery Each chapter builds upon the previous one starting with the initial discovery and archaeological context progressing through DNA and radiocarbon analysis and culminating in a climatological examination This approach moves beyond speculation offering a data driven interpretation that appeals to those interested in archaeology ancient history and the challenges of reconstructing past events The book emphasizes the importance of interdisciplinary collaboration in understanding human migration climate change impacts and the interpretation of archaeological evidence
