

SkyScan Lightning Detector/Storm Detector

- Manual -

INTRODUCTION

Congratulations! You have purchased the finest personal, portable lightning/storm detector available today. SkyScan gives you advance weather warning technology you can use at home, indoors or out, and take wherever you go, for any kind of outdoor sports and recreation.

Your SkyScan offers you the ability to detect the presence of lightning/ thunderstorm activity occurring within 40 miles of your location. SkyScan detects the characteristic electromagnetic emissions from individual lightning strokes and uses patented technology to determine the distance to the detected stroke. The distances are indicated in four ranges: 0-3 miles; 3-8 miles; 8-20 miles; and **20-40 miles**. This allows you to track the approach of dangerous storm activity.

IMPORTANT! SkyScan uses the latest electronic and computer technology to provide the most accurate information possible. However, thunderstorms are a dangerous and rapidly changing weather phenomenon. The information about storm activity obtained from your SkyScan should always be used in conjunction with information from your local weather professionals. Common sense and extreme caution should always be used when confronting lightning and thunderstorm activity.

GENERAL DESCRIPTION

Each time SkyScan detects a lightning stroke, it emits an audible warning tone (if this feature has been turned on by the user; see Section 5 in Basic Operation) and lights the **Range indicator** column. The full column stays lit for approximately 3 seconds. The single indicator corresponding to the range of detected stroke will then blink for approximately 25 seconds. This feature allows you to quickly see the distance to the last, closest detected stroke without waiting for SkyScan to detect a new stroke.

VERY IMPORTANT! Because the average stroke of lightning is 6 miles long, and because thunderstorms can move at speeds of up to 25 mph or more, you are in immediate danger any time there is detected lightning activity within 8-10 miles of your location. You must also remember that SkyScan does not predict where the next lightning stroke might occur. Thunderstorms are unpredictable and should be considered extremely dangerous. BE AWARE THAT STORMS CAN FORM DIRECTLY OVER YOUR LOCATION, OFFERING LITTLE OR NO ADVANCE WARNING, EVEN WHEN USING A SKYSCAN.
