### FEATURES

Champion Slick Magneto make timing, installation, inspection, and maintenance simpler and more convenient than ever before. We also incorporated mechanic-endorsed features to improve performance and service life.

- **Lift-off housing** – Internal timing is not disturbed during inspections.
- **Simplified internal timing** – Improved internal markings and unique Slick E-gap tool make timing easier and more accurate.
- **Fully sealed bearings** – Keeps contaminants out and grease in for smoother operation and less maintenance.
- **Lower EMI Levels** – Redesigned housing improves sealing and results in less radio noise.
- **OEM Approved** – Models are available for more than 225,000 engines – all compatible with existing Slick Ignition Harnesses.

### TECHNICAL INFORMATION

The function of the aviation piston engine ignition system is to provide an electrical spark to ignite the fuel/air mixture in the engine cylinders. The ignition system of the engine is a separate system and is not part of the airplane's overall electrical system. The magneto type ignition system is used on most reciprocating aircraft engines. Magnetos are engine-driven self-contained units that supply electrical current without using an external source of current. Magnetos are frequently not maintained to requirements specified in L1363 Manual - 4300/6300 Series Magneto Maintenance and Overhaul Manual, probably because they're so reliable and all engines have a redundant magneto. Magnetos need regular maintenance, and the consequences of neglect can be devastating.

Modern airplane engines are required by to have a dual ignition system – that is, two separate magnetos to supply the electric current to the two spark plugs contained in each cylinder. One magneto system supplies the current to one set of plugs, while the second magneto system supplies the current to the other set of plugs. The airplane's double ignition system provides better performance because of more efficient combustion and a higher level of safety through redundancy.

Champion Slick magnetos have applications on nearly all piston engines and are known for the following design features:

- **Smaller and lighter** unique design allowing for a dimensionally smaller magneto, resulting in easier installation and lighter weight - as much as one pound lighter than competitor magnetos.
- **Radio noise suppression**- Slick magnetos feature superior noise suppression, eliminating the need for magneto filters.
- **Easy to maintain** - Slick magnetos use up to 50% fewer parts than the competitive aircraft magnetos. In addition, 70% of the parts in any Slick magneto are interchangeable with the comparable parts in other current production Slick magnetos.
