The Corona Generation Jennie Bristow,Emma Gilland,2020-11-27 One of the UK s leading sociologists of generation uses both her scholarship and her ability to write beautifully to give meaning to the experience of Spring and Summer 2020

Professor Ellie Lee Director of the Centre for Parenting Culture Studies University of Kent It is already clear that the COVID 19 crisis will have huge social and economic implications The Corona Generation considers its effect on the generation currently coming of age the demographic currently known as Generation Z A generation that was already considered to be teetering on the brink of an uncertain political economic and environmental future now finds itself entering an adulthood in which nothing can be taken for granted where continuous crisis management is already presented as the new normal

Aging Invisibly, 2024-09-16 Statistical data suggest that many people with chronic health conditions pass away at much younger ages than their peers Yet large quantitative datasets that address aging with chronic illness often do not capture the diversity of people with chronic diseases and their experiences of growing older The assumptions built into many core data resources on aging often erase the journeys of people occupying marginalized social locations Likewise these same assumptions can result in omission of people who survive for long amounts of time while managing conditions with relatively short median life expectancies These barriers to understanding diverse experiences of aging with chronic illness are endemic but not unique to quantitative research Qualitative data collection can indeed offer richer insight into both of these intersecting sets of aging experiences However even more in depth approaches to inquiry with smaller groups of people require asking questions that explicitly explore and affirm the diversity of identities and health statuses held by older adults A more constructive and impactful approach to capturing meaningful data on diverse experiences of aging with chronic disease is thus to focus on affirming study architecture rather than viewing one particular set of methods as a panacea for exclusion With this new edited volume the editors support the broader goal of expanding knowledge on diverse trajectories of aging with chronic health conditions Contributed chapters range from critical reviews to methods primers to empirical investigations The authors focus synergistically on amplifying the attributes and experiences of diverse social populations and on highlighting journeys of longevity with chronic disease Contributors are Nicholas B DiCarlo Angela Hunt Ian M Johnson Nat Jones Kristen D Krause Nik M Lampe Ginny Natale Audria LB Kirsten Ostergren Clark Manacy Pai Michele Wise Wright and Terry Gene Wright
