Aircraft Performance Weight and Balance Thiago Lopes Brenner, 2021-05-15 This book

covers the physics of flight basic jet engine propulsion principles and regulations of aircraft performance and other related topics always with an innovative and simple approach to piloting and flight planning This way a traditionally complex study was made into something fun and easy The book is focused on class A aircraft performance and is suitable for those who are unfamiliar with airplane performance as well as for those with some previous background or experience who want to gain a more in depth understanding of the subject matter To sum up pilots professionals and students flight dispatchers aeronautical engineers and aviation enthusiasts Happy reading

Proceedings of the 21st Congress of the International Ergonomics Association (IEA 2021) Nancy L. Black,W. Patrick Neumann,Ian Noy,2021-05-17 This book presents the proceedings of the 21st Congress of the International Ergonomics Association IEA 2021 held online on June 13 18 2021 By highlighting the latest theories and models as well as cutting edge technologies and applications and by combining findings from a range of disciplines including engineering design robotics healthcare management computer science human biology and behavioral science it provides researchers and practitioners alike with a comprehensive timely guide on human factors and ergonomics It also offers an excellent source of innovative ideas to stimulate future discussions and developments aimed at applying knowledge and techniques to optimize system performance while at the same time promoting the health safety and wellbeing of individuals The proceedings include papers from researchers and practitioners scientists and physicians institutional leaders managers and policy makers that contribute to constructing the Human Factors and Ergonomics approach across a variety of methodologies domains and productive sectors This volume includes papers addressing the following topics Transport Ergonomics and Human Factors Practitioner Case Studies Human Factors in Robotics Manufacturing Agriculture HF E in Supply Chain Design and Management Aerospace Building and Construction

Conditional Function Control of Aircraft Andrey Vyacheslavovich Yakovlev,Andrey Sergeevich Istomin,Dmitry Alexandrovich Zatuchny,Yury Grigorievich Shatrakov,2021-04-09 This book highlights the prevention of possible accidents and crashes of aircrafts by analyzing the many factors that affect such events It includes the theoretical study of known ideas and concepts as well as a set of new methods and mathematical models It contains factual information to investigate famous disasters and aviation accidents with aircrafts The book proposes methods and models that can be the basis in developing guidance material for decision making by the flight crew and experts in air traffic control Some of the contents presented in this book are also useful in the design and operation of data transmission systems of aircraft The book is intended for engineering and technical specialists engaged in the development manufacturing and operations of onboard radio electronic systems of aircraft and ground based radio engineering support for flights as well as graduate students and senior students of radio engineering specialties It is useful to researchers and managers whose activities are related to air traffic control

Safe Take-off with Runway Analyses Boris Urbanek,2013-05-17 The economic situation of the recent years forces to operate aircraft at highest payloads possible and to load it at its maximum allowable take off masses Therefore take off

performance optimization is nowadays as important as never before This book offers a summary of factors affecting the maximum take off mass and appropriate take off speeds which together represent necessary performance data for a safe take off These are usually presented in so called runway analyses That is the reason why this book might be of interest for flight operations engineering personnel or pilots as it answers possible questions about the application and computing of the runway analyses

Generative Systems and Intelligent Tutoring Systems Sabine Graf,Angelos Markos,2025-07-28 This book constitutes the refereed proceedings of the 21st International Conference on Intelligent Tutoring Systems ITS 2025 held in Alexandroupolis Greece during June 2 6 2025 The 21 full papers 27 short papers and 5 posters included in this book were carefully reviewed and selected from 67 submissions The papers are organized in the following topical conference tracks Part I Generative Tutoring Systems The goal of this part is to show how new techniques inspired by artificial intelligence AI and new methods in education can improve learning teaching and generate the capacity for knowledge acquisition and much more Part II Application areas environments and techniques for AI systems This part shows the progress of research investigating the different application areas such as education health techniques such as neural networks data mining natural language processing and environments such as games virtual reality cognitive robots for effective AI systems

Novel and Intelligent Digital Systems: Proceedings of the 4th International Conference (NiDS 2024) Phivos Mylonas,Dimitris Kardaras,Jaime Caro,2024-10-15 This book compiles the research findings presented at the 4th International Conference on Novel Intelligent Digital Systems NiDS 2024 which took place in Athens Greece on September 25 27 2024 hosted by the University of West Attica NiDS 2024 was conducted in a hybrid format offering participants the flexibility to join either online or in person The conference highlighted the latest innovations in intelligent systems and emphasized the collaborative research that advances Artificial Intelligence AI in software development It served as a platform for high quality research providing a space to explore challenges and innovations in AI NiDS 2024 referred to experts researchers and scholars in artificial and computational intelligence as well as the broader field of computer science offering insights into interconnected and complementary areas By promoting the exchange of ideas the conference aimed to strengthen and expand the network of researchers academics and industry professionals
