Continental Connections Hugo Anderson-Whymark, Duncan Garrow, Fraser Sturt, 2015-02-26 The prehistories of Britain and Ireland are inescapably entwined with continental European narratives The central aim here is to explore cross channel relationships throughout later prehistory investigating the archaeological links material social cultural between the areas we now call Britain and Ireland and continental Europe from the Mesolithic through to the end of the Iron Age Since the separation from the European mainland of Ireland c 16 000 BC and Britain c 6000 BC their island nature has been seen as central to many aspects of life within them helping to define their senses of identity and forming a crucial part of their neighbourly relationship with continental Europe and with each other However it is important to remember that the surrounding seaways have often served to connect as well as to separate these islands from the continent In approaching the subject of continental connections in the long term and by bringing a variety of different archaeological perspectives associated with different periods to bear on it this volume provides a new a new synthesis of the ebbs and flows of the cross channel relationship over the course of 15 000 years of later prehistory enabling fresh understandings and new insights to emerge about the intimately linked trajectories of change in both regions *Mapping the connectome: Multi-level analysis of brain connectivity* Trygve B. The Pragmatics of Perception and Cognition in MT Jeremiah 1:1-6:30 Elizabeth

Hayes,2008-12-10 Recent advances in cognitive linguistics provide new avenues for reading and interpreting Biblical Hebrew prophetic text This volume utilises a multi layered cognitive linguistics approach to explore Jeremiah 1 1 6 30 incorporating insights from cognitive grammar cognitive science and conceptual blending theory While the modern reader is separated from the originators of these texts by time space and culture this analysis rests on the theory that both the originators and the modern reader share common features of embodied experience This opens the way for utilising cognitive models conceptual metaphor and mental spaces theory when reading and interpreting ancient texts This volume provides an introduction to cognitive theory and method Initially short examples from Jeremiah 1 1 6 30 are used to introduce the theory and method This is followed by a detailed comparison of traditional and cognitive approaches to Biblical Hebrew grammar These insights are then applied to further examples taken from Jeremiah 1 1 6 30 in order to test and refine the approach These findings show that Jeremiah 1 1 1 3 establishes perspective for the text as a whole and that subsequent shifts in perspective may be tracked using aspects of mental spaces theory Much of the textual content yields to concepts derived from conceptual metaphor studies and from conceptual blending theory which are introduced and explained using examples taken from Jeremiah 1 1 6 30 The entire analysis demonstrates some of the strengths and weaknesses of using recent cognitive theories and methods for analysing and interpreting ancient texts While such theories and methods do not obviate the need for traditional interpretive methods they do provide a more nuanced understanding of the ancient text

Transnational Connections Ulf Hannerz,2002-01-04 This work provides an account of culture in an age of globalization Ulf Hannerz argues that in an ever more interconnected world national understandings of culture have become insufficient He explores the implications of boundary crossings and long distance cultural flows for established notions of the local community nation and modernity Hannerz not only engages with theoretical debates about culture and globalization but raises issues of how we think and live today His account of the experience of global culture encompasses a shouting match in a New York street about Salman Rushdie a papal visit to the Maya Indians kung fu dancers in Nigeria and Rastafarians in Amsterdam the nostalgia of foreign correspondents and the surprising experiences of tourists in a world city or on a Borneo photo safari

Wittgenstein: Connections and Controversies P. M. S Hacker,2001-11-22 Wittgenstein Connections and Controversies consists of thirteen thematically linked essays on different aspects of the philosophy of Wittgenstein by one of the leading commentators on his work After an opening overview of Wittgenstein s philosophy the following essays fall into two classes those that investigate connections between the philosophy of Wittgenstein and other philosophers and philosophical trends and those which enter into some of the controversies that over the last two decades have raged over the interpretation of one aspect or another of Wittgenstein s writings The connections that are explored include the relationship between Wittgenstein s philosophy and the humanistic and hermeneutic traditions in European philosophy Wittgenstein s response to Frazer s Golden Bough and the interpretation of ritual actions his attitude towards and criticisms of Frege both

in the Tractatus and in the later philosophy the relationship between his ideas and those of members of the Vienna Circle on the matter of ostensive definition and a comparison of Carnap's conception of the elimination of metaphysics and of Strawson's rehabilitation of metaphysics with Wittgenstein's later criticisms of metaphysics. The controversies into which Hacker enters include the Diamond Conant interpretation of the Tractatus which is shown to be inconsistent with the text of the Tractatus and with Wittgenstein's explanations of and comments on his book. Winch's interpretation of the Tractatus conception of names, Kripke's interpretation of Wittgenstein's discussion of following a rule which is demonstrated to be remote from Wittgenstein's intentions and Malcolm's defence of the idea that Wittgenstein claimed that mastery of a language logically requires that the language be shared with other speakers. These far-ranging essays, several of them previously unpublished or difficult to find, shed much light upon different aspects of Wittgenstein's thought and upon the controversies which it has stimulated.

Connections Professor Jean Hillier, Dr Jonathan Metzger, 2015-04-28

The title Connections symbolises relationality, possibly the most outstanding element linking Patsy's ideas. The book showcases the wide international influence of Patsy's work and celebrates the whole trajectory of work to show how many of her ideas on, for instance, the role of theory in planning processes of change, networking as a mode of governance, how ideas spread and ways of thinking, planning democratically, were ahead of their time and are still of importance.

Hydraulic design and management of wastewater transport systems Michiel Tukker, Kees Kooij, Ivo Pothof, 2016-04-15

Hydraulic Design and Management of Wastewater Transport Systems is a manual resulting from the research project CAPWAT: CAPacity loss in wasteWATER pressure pipelines, which researched the mechanisms for the creation, stagnation and discharge of gas bubbles in wastewater pressure pipelines. During this six-year research programme, it was recognised that there is no hydraulic manual guideline that focuses on the entire wastewater pressure pipeline system.

the processes it includes and the interaction between the pressure pipeline and the pumping station This manual provides a compilation of all the hydraulic knowledge that is necessary for designing a wastewater transport system and to manage it operationally The wastewater transport system is the link between the collection and treatment of the wastewater and the collection system includes among others the gravity flow sewage system from the house or consumer and service connection through street and main sewers up to the suction basins The transport system for which this manual was written includes the suction basin the sewage pumping station and the pressure pipelines Wastewater transport systems are becoming more complex due to building larger sewage water treatment plants wastewater being transported over greater distances and increasingly more and smaller pipelines connecting to the main sewers The operation of the pumping stations is largely determined by how the entire system behaves Insight into this operation is therefore crucial for proper design and management The central point of the design is to create an independent and safe system with the necessary transport capacity at minimum societal costs Predominantly the management aspect focuses on guidelines to maintain the design principles regarding capacity and required energy
