The Anthropology Of Religion Magic Witchcraft:

The Anthropology of Religion, Magic, and Witchcraft Rebecca L. Stein, Philip L. Stein, Benjamin R. Kracht, Marjorie M. Snipes, 2024-07-16 This concise and accessible textbook introduces students to the anthropological study of religion. It examines religious expression from a cross cultural perspective and exposes students to the complexities of religion in small scale and complex societies. The chapters incorporate key theoretical concepts and a wide range of ethnographic material. The fifth edition of *The Anthropology of Religion Magic and Witchcraft* offers a revised introduction covering the foundations of the anthropology of religion, anthropological methods, and a push toward decolonizing the anthropology of religion. It includes expanded coverage of symbols, healing, wizardry, and the intersections of religion with other social institutions. New case study material with examples drawn from around the globe, especially from Indigenous communities, is included in each chapter, introducing provocative small case examples related to the chapter. Many of these can be used as prompts for further research, small in class case studies, or examples for hands on learning. A new chapter on religion and healing is especially useful for Anthropology programs without representation of four fields, as it provides a wider and more interdisciplinary application of the discipline. A consistent review of foundations from chapter to chapter, linking material and enabling students to connect what they are learning throughout the course, and further resources via a comprehensive companion website including interactive activities, critical case studies, updated study questions, bibliographical suggestions, including video and color images. This is an essential guide for students encountering the anthropology of religion for the first time and also for those with an ongoing interest in this fascinating field.

Rethinking the Anthropology of Magic and Witchcraft Phillips Stevens, 2023-12 This book introduces students to the anthropology of magic witchcraft and supernatural belief It takes a new approach to this area within the anthropology of religion demonstrating that the bases for these beliefs and

alleged practices are instinctual inherent in human cognition and psychology and are likely rooted in our evolutionary biology. It shows how magic and magical thinking are regular elements in people's daily activities and that understanding the components of the witchcraft complex offers surprisingly important insights into patterns of thinking and social behavior. The book reviews the many meanings of magic and witchcraft, explains why they are inadequate, and introduces the anthropological meanings of the terms. The components of these beliefs are timeless and universal; this fact and recent advances in the brain sciences suggest that the principles of magic are derived from basic processes of human thinking and the attributes of the witch derive from neurobiologically based fears and fantasies. Such beliefs had adaptive significance in the evolutionary development of the human species; they are inherently human. This book is intended to focus anew on the core concepts of magic, witchcraft, and the supernatural while also serving as a valuable introduction to the anthropology of religion for undergraduate and graduate level courses.
